

April 2017 Update

Replacement of the Existing Water Siphons between Brooklyn and Staten Island “Siphon Project”

The Siphon Project is nearing completion! Work during the upcoming months will focus on abandonment of the chambers in Staten Island and Brooklyn that were part of the original siphons, completion of the chlorination station and restoration of the Staten Island and Brooklyn shaft sites.

Background Information

The New York City Economic Development Corporation (EDC) is administering the Siphon Project, which is being funded by the New York City Department of Environmental Protection (DEP) and the Port Authority of New York & New Jersey (PANYNJ).

Major components of the project include the following:

- use of a TBM to install a new 72” water siphon
- installation of land piping (new water mains and sewers) in Staten Island and Brooklyn using open cut and microtunneling techniques
- construction of a new “green building” chlorination station in Staten Island
- implementation of an extensive community outreach program, including development of informational materials and ongoing liaison with residents, businesses and other stakeholders

Work During March 2017

- Continuation of preparatory work (drawings, permit applications and other submittals) in support of land piping and chlorination building activities in Staten Island and Brooklyn
- Continuation of work in support of construction of the new chlorination station, including installation of piping and equipment within the building, perimeter fencing, installation of the irrigation system for the roof and planning for and installation of the communication system between the existing Richmond Chlorination Station and the new Siphon Chlorination Station
- Community outreach activities, including coordination with Staten Island Community Board #1, Brooklyn Community Board #10, representatives of Fort Hamilton High School, and other groups and individuals; preparation and distribution of informational materials (Project Update, etc.); updating of the project web site; and ongoing liaison with residents, businesses, and other interested stakeholders and constituencies

Work Projected for April 2017

- Continuation of preparatory work (drawings, permit applications and other submittals) in support of land piping and chlorination building activities in Staten Island and Brooklyn
- Continuation of work in support of construction of the new chlorination station, including installation of piping and equipment within the building, perimeter fencing, installation of the irrigation system for the roof and testing of equipment

- Continuation of land piping work in Staten Island, including:
 - Installation of 18” sewer at the Staten Island Shaft Site and along Front Street in the vicinity of the Staten Island Shaft Site
 - Installation of 48” sewer outfall on Front Street in the vicinity of the Staten Island Shaft Site [**NOTE:** This work may require **intermittent** closure of Front Street, between Wave and Hannah Streets, to vehicular and pedestrian traffic.]
 - Demolition and abandonment of the venturi chamber on Victory Boulevard in the vicinity of Lyons Pool
- Continuation of land piping work in Brooklyn, including:
 - Demolition and abandonment of two existing venturi chambers on the west side of Shore Road, at 79th and 86th Streets
- Restoration of Brooklyn and Staten Island Shaft Sites, including restoration of Shore Road Park
- Continuation of community outreach program, including coordination and meetings with Staten Island Community Board #1, Brooklyn Community Board #10, representatives of Fort Hamilton High School, and other groups and individuals, as needed; preparation and distribution of informational materials (Project Update, Construction Notices, etc.); updating of project web site; and ongoing liaison with residents, businesses and other interested stakeholders and constituencies
