

May 2017 Update

Replacement of the Existing Water Siphons between Brooklyn and Staten Island “Siphon Project”

The Siphon Project is nearing completion! Abandonment of the chambers in Staten Island and Brooklyn that were part of the original siphons was completed last month, and work continues on the chlorination station. Upcoming work will focus on restoration of the Staten Island and Brooklyn shaft sites and remaining land piping work in Staten Island.

Background Information

The New York City Economic Development Corporation (EDC) is administering the Siphon Project, which is being funded by the New York City Department of Environmental Protection (DEP) and the Port Authority of New York & New Jersey (PANYNJ).

Major components of the project include the following:

- use of a TBM to install a new 72” water siphon
- installation of land piping (new water mains and sewers) in Staten Island and Brooklyn using open cut and microtunneling techniques
- construction of a new “green building” chlorination station in Staten Island
- implementation of an extensive community outreach program, including development of informational materials and ongoing liaison with residents, businesses and other stakeholders

Work During April 2017

- Continuation of preparatory work (drawings, permit applications and other submittals) in support of land piping and chlorination building activities in Staten Island and Brooklyn
- Continuation of work in support of construction of the new chlorination station, including installation of equipment within the existing Richmond Chlorination Station to facilitate communication with the Siphon Chlorination Station
- Continuation of land piping work in Staten Island, including:
 - Demolition and abandonment of the venturi chamber on Victory Boulevard in the vicinity of Lyons Pool
- Continuation of land piping work in Brooklyn, including:
 - Demolition and abandonment of two existing venturi chambers on the west side of Shore Road, at 79th and 86th Streets
- Cleanup of Brooklyn Shaft Site in preparation for restoration of Shore Road Park
- Community outreach activities, including coordination with Staten Island Community Board #1, Brooklyn Community Board #10, representatives of Fort Hamilton High School, and other groups and individuals; preparation and distribution of informational materials (Project Update, etc.); updating of the project web site; and ongoing liaison with residents, businesses, and other interested stakeholders and constituencies

Work Projected for May 2017

- Continuation of preparatory work (drawings, permit applications and other submittals) in support of land piping and chlorination building activities in Staten Island and Brooklyn
- Continuation of work in support of construction of the new chlorination station, including installation of piping and equipment within the building and testing of equipment
- Continuation of land piping work in Staten Island, including:
 - Installation of sewer drainage within the Staten Island Shaft Site and 18" sewer along Front Street in the vicinity of the Staten Island Shaft Site
 - Installation of 48" sewer outfall on Front Street in the vicinity of the Staten Island Shaft Site [**NOTE:** This work may require **intermittent** closure of Front Street, between Wave and Hannah Streets, to vehicular and pedestrian traffic.]
- Continuation of cleanup of Brooklyn Shaft Site in preparation for restoration of Shore Road Park
- Continuation of community outreach program, including coordination and meetings with Staten Island Community Board #1, Brooklyn Community Board #10, representatives of Fort Hamilton High School, and other groups and individuals, as needed; preparation and distribution of informational materials (Project Update, Construction Notices, etc.); updating of project web site; and ongoing liaison with residents, businesses and other interested stakeholders and constituencies
