

Offshore wind will create tens of thousands of new family-sustaining jobs in New York State.

Career Opportunities

Billions of dollars are being invested in New York State's offshore wind energy infrastructure. Our state will see thousands of new jobs created from Long Island to the Capital Region to support development, manufacturing, installation, and operation of offshore wind facilities.

Workforce Training

Specialized degrees, certifications, apprenticeships, union training, academic study and research tracks, continuing education courses, and industry internships are all available through workforce development pathways.

Compensation

Many offshore wind jobs will be family sustaining, high-quality unionized jobs, especially in the area of port and facility construction, marshalling, staging, final assembly of wind projects, and transmission activities.
