Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	01/07/09 I responded to the spill site on behalf of Veronica Zhune as I had another site inspection in Manhattan.The spill occurred in the Postal Service's vehicle shop from a motor oil line and spilled onto the floor(40x30 ' area).Postal service cordoned the area and putdown speedy dry on it, was waiting for their stand by contractor to be on the site and start the clean up. Apparently, there was no cracks/holes,drain on the floor and spill was contained on the floor.A closure report will be sent to DEC after the clean up is done.(sr) 01/08/09 Rec'd call from Ismael Velez,USPS.

POSTAL VEHICLE GARAGE (Continued) **S109414161**

Clean up has been completed by OP-TECH.Disposal manifest provided.As per Mr. Velez, the floor is
sealed and as such, oil has no way to escape to the subsurface. I told him to send us few pictures
of the cleaned site to keep in our records, he said he would do that.(sr)

Remarks: A line rupture cause oil to flow out of the tank onto the concrete floor. Spill was contained and Opteck environmental is enroute for cleanup.

DEC Memo:	6/18/20 - Sekhon Lisa - lbenhayon@tanknology.com Eric Borden -703-357-7076 (eric.b.green@wsp.com;) [Eric.Borden@wsp.com] Tankology (notifier) performed a 3-year hydrostatic testing on the Under Dispenser Containment and the Tank STP Containment of Underground Storage Tanks at USPS 909 Third Ave, New York, NY. The containment sumps were filled with water to highest seam and monitored for 1 hour. The water in both dispenser sumps dropped 3 in 1 hour, therefore, the testing failed and the containment seam and penetration boots will need to be repaired and there is no release of petroleum product. 8/14 - Sekhon email send to get updates. 9/3 - Sekhon email send to get updates. 9/3/20 - sekhon Report submitted. DECDOCS 9/10/20 - Sekhon Required repairs done, Submitted report reviewed & case closed.
Remarks:	no materials leaked only, dispenser containment pumps failed

DEC Memo:	07/28/05 Reassigned to Dennis M. Pokrzywka for Spill Closure Initiative Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This spill was reassigned from DEC Sigona to Rommel on January 7, 2004. DEC INVESTIGATED SPILL MET WITH SOIL MECHANICS CARL VERNICK ON 8/24/95 AT 11AM. MARKED OUT PRPOSED LOCATIONS FOR MONITORING WELLS/SOIL BORINGS AROUND ABANDONED 2- 550 GALLON USTS. ASKED HIM TO TEST SOILS FOR VOLATILE ORGANICS. ON OCTOBER 20, 1995 SOIL MECHANICS/ENVIRONMENTAL SERVICES-SUBMITTED RESULTS OF SOIL BORINGS 8 BORINGS TO A DEPTH OF 15 FEET. THEY USED TPH AND HEAD SPACE ANALYSIS TO EVALUATE SOIL SAMPLES. THE RESULTS INDICATED ELEVATED READINGS, REQUESTED TO RETEST SAMPLES FOR 8020 CONSITUENTS. THE SAMPLES EXPIRED THE TIME PERIOD FOR VOLATILES BUT WE SUGGESTED THAT THEY TRY TO TEST THEM ANYWAY. ON 10/24/95 SPOKE TO GORDON HAMM AT GMC TO REQUEST RE-TEST OF SOIL USING EPA METHOD 8021, THEY AGREED. Foil Request received Michelle.Escobedo@2AveSubway.com ON 11/15/95 DEC RECEIVED VOLATILE RESULTS. i.e. 210 PPM-XYLENE, 2.4 PPM BENZENE. THE RESULTS WERE RELATIVELY HIGH FOR SOIL. ON 12/5/95 SENT CERTIFIED LETTER TO VIC CIZI REQUESTING FOLLOW-UP AT GARAGE MANAGEMENT. WILL FOLLOW-UP WITH LETTER FOR STIPULATION. On January 3, 1996, sent certified letter requesting letter for commitment and request for stipulation. The stipulation is due on January 17th, 1996, and a corrective action plan is due on January 30, 1995. On September 22, 1999, the DEC received a follow-up report on the effectiveness of the cleanup and to evaluate the groundwater at this site. DEC Sigona sent

GARAGE MANAGEMENT CORP (Continued) **S104275740**

letter on November 26, 1999 requesting further operation of the SVES. 12/11/2006 - Correspondence with Katrina (Kathy) of Soil Mechanics. Tried to emphasize Bullet Point 3 from November 26, 1999 letter (Sigona) several times in Email and conversation with Katrina (Soil Mechanics). Asked for some recent Air Reports from SVE systems, which is apparently still running. Told her, if we could simply get some soil samples we could likely bring this spill to closure. See Email transcript in Edocs. Spoke with Gordon Hamm very briefly (Jan 10, 2007) and relayed the same info (above) to him. June 26, 2008 - Contacted again by Steve Schmid, consultant with 2nd ave subway - www.2AveSubway.com, Construction consultant for MTA, wanting to do some subway work. He's trying to coordinate an on-site meeting with owners to prep for an exploratory drilling project in the garage, but is a little apprehensive. I told him spill is still open, and not his responsibility, but if, during excavation they encounter gross contamination, to call the spill hotline, but also have them refer, or make a note in reference to this spill. DMP March 02, 2010 - Dan Marzano of Soil Mechanics called me, asking about this spill, and how / if we can bring it to a close. Mentioned something about the SVE system, which had been running up unitl about a month ago. He is interested in getting the latest status report, and following our latest recommendation to bring the spill to a close. Nov 23, 2010 - Call From Dan Marzano at Soil Mechanics, Requesting closure. dmarzano@soilmechanicscorp.com - (516) 315-0574. He restated that Sub-Slab Soil borings / sampling would be too difficult, because of limitations getting a drill rig through an elevator shaft (only access). The area that was excavated is already sealed off (concrete). He is sending the latest Air Samples from the SVE system, and will send a letter requesting closure. Follow -up call with Dan Marzano, letter, and Air Smapling reports, on its way. Spill is being closed administratively 11/29/2010. DMP Dec 03, 2010, Fax (Letter Dec 06, 2010 via Mail) Received From Soil Mechanics from Dan Marzano. Letter requesting closure, along with latest air sampling reports associated with the soil vapor extraction system as requested. Letter states that system has effectively remediated contamininamtion and residual levels will naturally attenuate. Declining contaminant concentrations based on air samples indicate a diminishing point of return to keep running the SVE. No indication of off-site contaminant migration (i.e. in adjacent Subway), therefore spill is being closed. Dec 08, 2010. UIS Comments updated, letter, and Email transcript added to Edocs. DMP Re: NEW FOIL 12-1387 (Escobedo) Spill 9505495, New Spill discovered suring excavation. 1201243 Michelle.Escobedo@2AveSubway.com - Michelle a a contractor (Parsons, Brinkerhoff), Mobile: 646-467-2289 May 15, 2011, Sent (zipped) documents in Edocs out electronically and cc'ing to foil officers, but there's not much that they will find helpful in order to meet their more immediate objective. Their primary concern is they need to know if they can go forth with their construction / utility project. In order to do this they (contractor) needs to know 1.) Can they cut / plug / cap some of the old SVE systems lines in or do some excavtation? Old SVE systems still is there, though not running. 2.) What should they do with the 2 wells that are still on-site (in the basement near the excation site) Thanks for calling Friday to explain your need to look at the Spill file. I am sending a few files in the embedded zip file attachement that I scanned in a couple of years ago. It contains more relevant, correspondences, site sketches, and most recent reports. The (paper) file is pretty thick with many pages

GARAGE MANAGEMENT CORP (Continued) **S104275740**

of old air samples from a former SVE, that I don't think will have any relevance to keeping your project on schedule. I am going to follow up with a call in a couple of minutes to discuss the your concerns about the SVE system and the 2 monitoring wells that remain on site. May 15, 2012 PM Wrote back : Michele, As I mentioned during our discussion, Spill 9505495 is closed, and no further remedial action at this site from this spill is necessary. Any activities involving the former remedial system or any appurtenances to it must be coordinated with the owner of this property, Garage Management, Corp. For your information, I have attached a subsurface investigation report, 9505495_Apr23_96.pdf with a site sketch (p4) illustrating soil boring locations and soil boring logs. I see no indication of any monitoring wells from this report, or any of the other reports in the file. If further contamination is encountered during your upcoming site work, you can report it to the NY State Spill Hotline at 1800 457-7362. 4/1/13-Vought-See also spill #1201243 at sme site.

DEC Memo:	5/5/21 - Kim - I called Milton with All Boro. All Boro collected soil samples and groundwater samples that are going to be sent to the lab tomorrow. All Boro is planning on opening the tank and inspecting the bottom of the tank. The suspected cause of the tank failure is from groundwater. 5/25/21 - Kim - All Boro collected water samples for 240 East 55th St. This location had a tank test failure and All Boro extracted samples which were all water. Samples were collected every 5 feet along the tanks bottom. Lab analysis results did not show significant levels of contamination. 1/25/22 - Kim - Based on the provided information, the tank test failure did not result in a release to soil or groundwater. A copy of the lab analysis results were uploaded to DecDocs. PBS 2-282243 records indicate that tank repairs were made by All Boro and the passing tank test was forwarded to DEC PBS unit; a consent order was fully executed on 12/2/21 and the case was closed. Spill case closed.

DEC Memo: 4/25/07 bf: ttf letter sent to: President Brevard Owners, Inc. 245 East 54th Street New York, NY 10022 5/10/07 on 5/7/07, received fax cc from Brevard Owners for Petroleum Tanks to make repairs to remove vent lines, install new vent and fill lines, and retest sytem. Also to drum and dispose of contaminated debris. bf 6/21/07 Called Brevard Owners. (212)371-8383. Spoke to secretary. She told me I need to speak with either Louis Perilla (super) or Evelyn Garavito (account executive) neither one was in today. I left my name and number to have one of them call me back. bf 6/22/07 Called Evelyn Garavito. She recived tank results from PTC. She said that PTC told her it was her responsibility to prepare letter in rtesponse to 4/25/07 letter. I told her it is her responsibility to make sure DEC receives it, but it must be prepared by a third party. She will call PTC today to get the letter prepared. bf 7/9/07 Spoke with Ms. Garavito and told her DEC needs a report from PTC explaining what was done to repair the tank, contamination, etc. bf 1/20/09 Inspected site on 1/16/09.

EVELYN GARAVITO (Continued) **S110242787**

Issued NOV for NL 176, tank/gauge not labeled, and failure to inspect monthly. Settlement conference scheduled for 2/3/09. bf 4/14/09 PBS Settlement Conference held today. Attended by Evelyn Garavito, Louise Munster, and Brian Falvey. Gave Ms. Garavito instructions to contact Petroleum Tank Cleaners to prepare a response to letter. She submitted a passing tightness test dated 5/23/07. bf 5/18/09 Recieved letter from Petroleum Tank Cleaners on 5/13/09. Tank failure was due to the vent and fill lines. Both lines were replaced. A small amount of oil spilled on floor from a branch of the fill line. Product was cleaned and taken away by Rapid Waste Disposal. NFA. Tank passed tightness test on 5/23/07. bf

DEC Memo:	DEC Piper performed site viist. #6 oil is under slab and coming up through sewer pipes and cracks. Recovery pit warranted. as well as investigation. Brevard Apartments 1035 2 Ave ny, ny 10022 2-145769 4/24/13- DEC Piper mailed 2nd csl to Douglas elliman. 9/3/13- DECPiper was contacted via email by Rite Way, David Chan. He said There were pits in the garage that had slight contamination in it and they proceeded to pump and monitor the pits on a regular basis. The pit was relatively clean by August 2010 after about 10-12 visits and they were asked to stop the pump outs. they didn't hear anything for a while and the building never instructed us to perform a closure. In December of 2011 they performed a cleaning of the vent line. Recently in May of 2013, Douglas Elliman contacted Riteway to perform delineation in the boiler room. Sample results only detected one VOC above standards and SVOC contamination. However, refusal was met in all locations at three feet. 9/3/13- DECPiper received poropsal to install recovery pit. I disapproved and recommeded digout. 9/22/2013- DEC Piper recieved email from E. Gail Suchman, Esq. of Stroock & Stroock & Lavan LLP . 10/7/15- DEC piper received notification that building epoxied boiler room floor. Low level VOC and SVOC residual 6 oil contamination exist. Based on work to date, this spill is closed.
Remarks:	interior tank spill to concrete. Clean up en rte

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was ZHAO 4/24/2001 Jie Zhao spoke with Tony Peretta (Mystic Transport). Mr. Peretta said the spill was contained and no drains or sewers were involved. 4/25/2002 - 9AM Sangesland visited the site. Oil shot out of a vent line on the side of the building and sprayed over the cement courtyard of the apartment building. There WAS A DRAIN in the center of this courtyard and as of 9AM on 4/25 the area was wetted down with water & degreaser. A Mystic employee was at the site and large globs of oil were seen flowing down into the drain. Sangesland called Mr. Peretta to identify the problem. He said he would call Castleton Environmental (Perry @ 800-258-2657). DEP was informed - DEP # 439858 Building super is Joseph Kowalski 212-759-5745 4/30/2002 - 1:29pm Perry from Castleton Environmental left a message to Zhao stating that clean up has been done. The company sent Vaccum truck, speedy dry, etc. cleaned up drain and flushed drain. 5/2/2002 - 9:20am Zhao contacted Steve Greenspan, Charlie Greenthal Management Company at (212) 644-6703, Mr Greenspan confirmed that the overfill spill had been cleaned up with satisfaction. He considered the clean up company did a good job. 5/6/2002 - 10:40AM Zhao contacted Castleton Environmental Inc owner Bill Jacobs (973) 332-4972 for written statement how clean up job performed. Mr Jacobs said this letter will be faxed over by this Friday. 5/10/2002 - The above requested letter is received today. jz

DEC Memo:	Demeo needs to send a TTF letter to property owner 10/18/12 TJD T/C with Greg Collins @ GC Environmental. Conversion from #6 >> #4 Fuel Oil. 3K AST tested after cleaning failed tightness test when empty. Concrete floor reported in good condition with no cracks or drains reported. Tank was installed with bottom in contact with soil - tank has been temporarily jacked and supported - no holes noted. GC Environmental has subcontracted with WCC Tank Technology of Newburgh (845 564 9555) for relining tank with fiberglass. DEC informed Greg Collins that PBS registration must be updated to reflect changes & appropriate standards must be followed in application and installation of proposed liner. A minimimum of (3) soil borings must be performed along centerline of tank bottom to a minimum depth of 2 ft bgs - samples should be field screened with a PID and endpoint samples are required to be analyized at NYS ELAP approved laboratory utilizing EPA methods 8260/8270. Prior to the relining of tank a new concrete floor will be poured and tank will be placed on newly

APARTMENT BLDG - TTF (Continued) **S112148866**

installed saddles. Following completion of repairs and prior to filling tank with product a system test must be performed. Greg was directed to provide DEC with an update of any significant findings identified during subsurface investigation prior to backfill. Photographs, boring logs, laboratory reports, and copies of both initial failed tank test and final tank test are required as part of closure documentation. 2/11/13 TJD File review. Greg Collins (GCI Environmental was notified via e-mail that closure report submitted was missing required information. As per DEC directive, consultant was required to include copy of failing tank tightness (dated 8/7/12) and following repairs to tank a system tightness test is reuired. Documentation contained in closure report does not include original failing tightness test and the 12/18/12 tightness test is listed as a tank only test. In addition, the PBS registration application contained in closure report does not accurately reflect tank sytem currently in operation. GCI has been requested to investigate discrepencies and resubmit an ammended closure report. Awaiting revised report. 3/7/13 TJD File review. Revised report has been received. Initial failing tightness test is for a dry leak . A total of (3) soil borings were performed along centerline beneath AST - laboratory analysis of collected samples are within acceptable limits. Missing documentation has been provided. PBS registration included with revised report still appears to contain information inconsistent with tank system in operation at facility - PBS unit (BF) has been informed of potential discrepencies and will perform the necessary follow-up if warranted. No furher action is required.

Remarks: Test failure. Tank replacement being scheduled. Cleanup is pending.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 1/26/2004 Old TTF letter sent to property owner per city tax records. RGHF&R Enterprises Inc. 120 5th Ave, 11th Flr, NY, NY 10011 11/01/2005 - Changed DEC lead from Sangesland to Zalewski. (Zalewski) 1/18/2006 - Received a phone call from Nick Haines (Bromley Companies). They are in the middle of a real estate transaction and are requesting closure for this spill. He said he would fax over the documentation. (Zalewski) 1/20/2006 - Reviewed 17 page fax. No site sketch. No details on source of tightness test failure or where the repairs were made. No site assessment. One document referenced Spill No. 9511065. Review of that spill indicated oil leaking through the basement walls next door at 110 West 57th Street a couple of months prior. This spill is assigned to Mike Mulqueen. Sent an e-mail to Mike Mulqueen requesting information. (Zalewski) 1/20/2006 - Spoke to Nick Haines. He will check their records to see if any environmental site assessment was conducted. He was not aware of the open spill next door and will see if they have any info. related to it. (Zalewski) 1/23/2006 - Received phone call from Nick Haines and Joe DeGrotta (Bromley Companies). They called testing company and the tester who conducted the test had died, but they will check their records to see if they have any paperwork. Per Joe DeGrotta, the AST rested on the slab and was encased in block. The plate welding mentioned in the scope of work was a contingency and no plate welding was necessary. (Zalewski) 1/27/2006 - Received an e-mail reply from Mike Mulqueen that he had no files but would check his field notes. (Zalewski) 1/27/2006 - Sent an e-mail to Nick Haines requesting additional info. (Zalewski) 1/27/2006 - Spoke with Jeff Cohen (Bernstein Real Estate). He is now the property manager for 110 West 57th St. He will contact the building superintendent to gather info. on the spill reported in 1995 at their property. (Zalewski) 2/1/2006 - Handled a phone call from Nick Haines. He will call the tank testing company to see if they have any records from the failing tightness test. (Zalewski) 2/2/2006 - Placed a phone call

108 WEST 57TH ST (Continued) **S102232669**

to Jeff Cohen. He has not had a chance to get in touch with his superintendent yet. He will follow-up. (Zalewski) 2/3/2006 - Recevied a phone call from Nick Haines. They called State Environmental Services and Roebling Plumbing (out of business) and were not able to locate any additional information. (Zalewski) 2/6/2006 - Placed a phone call to Jeff Cohen. He was NA. Left a voice mail message requesting a call back. (Zalewski) 2/7/2006 - Sent an e-mail to Koon Tang to see if he has had any contact with Mike Mulqueen regarding Spill No. 9511065. Koon replied that Mike said he could not recall the site. (Zalewski) 2/9/2006 - Handled a phone call from Nick Haines. I updated him on the status of my investigation into the spill reported next door. 2/10/2006 - Per Nick Haines' request, drafted and sent a letter updating them on the status of our review and describing the actions they can take to demonstrate that the underground fill lines were not the source of the tank test failure and did not have a release. (Zalewski) 2/14/2006 - Placed a phone call to Jeff Cohen. He is having trouble locating anyone (Directors Guild of America or building superintendent) with knowledge of the spill report at 110 West 57th St. The current superintendent has only been there for a few years. I sent an e-mail to Jeff to formalize my request for any available information and attached a copy of the spill report form. (Zalewski) 2/28/2006 - Participated in a conf. call with Nick Haines and Joe DeGrotta (Bromley Cos.). They e-mailed a site plan showing the layout of the tank system and photos of the vault(beneath the sidewalk) where the fill line entered the building. The only area where the fill line came in contact with the soil was the short section between the fill box and where it entered the building by penetrating the vault. I verbally approved their proposal to sample the soil via a boring in the area between the fill box and the vault. (Zalewski) 3/1/2006 - Handled a phone call from Nick Haines. He asked if it would be acceptable to conduct the soil boring in the basement in the event utilities prevent conducting a boring in the sidewalk. Since the distance from the fill box to the former tank inside the basement is only 6-8 feet, I said it would be acceptable as long as the boring can advance to the appropriate depth. I also asked for some photos of the location of the former AST area. (Zalewski) 3/1/2006 - Received an e-mail from Jeff Cohen. There is no further evidence of any oil leak at 110 West 57th St. (Zalewski) 3/20/2006 - Received a phone call from Nick Haines. He said that they had a contractor come in last Saturday, drilled through the slab and collected soil for analysis. He expects to have the results by March 24. (Zalewski) 3/31/2006 - Reviewed data from March 29, 2006 subsurface investigation report. A boring was conducted next to the former fill box. Soil sampled to depth of six feet. Analytical results revealed low level SVOCs with only one compound exceeding direct contact criteria. Based on the available information, no further action. (Zalewski)

Remarks: tank would not hold vacume / will investigate

DEC Memo:	3/26/2015- Ahmed- Received closure request from Mark Salamack at Petroleum Tank Cleaners (PTC). PTC was hired by the management company Buckbinder and Warren to clean a 4000 gal #4 oil UST. After the cleanup they did a tightness test and the tank system failed. Then they isolated the lines and tank, the tank, suction and return lines were tight but the fill and vent lines failed. They dug out the old line and found a small crack in the fill line where it entered in the building foundation. they didnot notice any contaminated soil at the bottom of the excavation for the fill line. They replaced the whole fill line. Asked mark if they took any pictures. he said they

315 E. 56TH ST (Continued) **S106701802**

didn't notice and soil stain so they didn't take any pictures.
6/17/15-Ahmed based on the evidance submitted so far, the spill closed.

Remarks: Above liquid leak, tank room, no resources affected.

DEC Memo:	9/26/06 sent ttf letter to: Alex Kirchesbaum Parker-Hart Limited Partnership 311 East 54th Street NY, NY 10022 bf spoke with Joe of Petroleum Tanks: possible cause is loose manhole cover. 10/26/06 spoke with Scott Taylor of National Environmental Specialists. (914)403-2921. Tank is in vault drilled holes through concrete. Ground was visible and no product was observed on the floor. He believes tank manhole gasket is faulty and caused the failure. will have tank retested on 10/30/06. 12/19/07 Spoke with Reid Turoff of Energy Tank (718) 257-8470. Repairs made to manhole. No contamination found. 4 samples taken at each corner of tank. Will receive report shortly. bf 1/3/08 Received letter from R. Turoff. Energy Tank excavated, isolated, and retested. Vent line and gravity fill line were defective. The lines were replaced. System was retested and passed. No evidence of staining or odors found. Four samples taken. NFA. Called R. Turoff and told him that tank is not properly registered and that I will fax him the application. he wanted to know if it was ok to conrete the area. I told him yes. Inactivation letter sent to Parker Hart Realty. Faxed letter and application for information change to Reid turoff (718)257-8430. bf

DEC Memo:	9/21/05 spoke with James Wood from the hospital. Mr. Wood is seeking to close out spill. He was informed that he needs to submit 1) Copy of a work order saying either the lines had been repaired or replaced, 2) Copy of a new system test report showing the system passed. SR Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL C 6/30/99 Report forwarded to Sangesland. Caller stated that the building is being sold and the tanks were retested again and failed. System was isolated. Caller says the tank is OK, but both the supply and vent lines failed. Sangesland informed the caller that they need to submit 1) Copy of a work order saying either the lines had been repaired or replaced, 2) Copy of a new system test report showing the system passed. Caller says work will be done ASAP because it's holding up the building sale. Ref: spill# 0002384. 4/12/04-Vought-Spill transferred from Sangesland to Rommel as per Rommel. 08/13/12 - LZ As Randy Austin requested, the spill has been reassigned to Tim DeMeo 3/5/13 TJD File review. Theresa Colabella

MANHATTAN EYE HOSPITAL - TTF (Continued) **U003074986**

from PW Grosser has contacted DEC R2 on multiple occassion in an attempt to have open spill file closed (TTF). Documentation provided is incomplete. Theresa states the hospital was sold in 2010 and under new ownership - limited records prior to sale are available. After multiple back and forth communication with PW Grosser DEC (DEMEO) contacted original tester (ProTest) in attempt to obtain necessary documentation in support of closure. Initial tank tighness test failure occurred on 1/9/98. Protest provided a letter previously sent to DEC on 11/6/00 detailing cause of failure - faulty petrometer fitting on tank top which was plugged. Tank (system) was then retested on 5/27/98 and passed. ProTest additionally reports in July 1999 they were retained to investigate another tightness test failure - tank and lines were tested seperately - tank passed suction and vent lines failed an isolation test. Spill 0002384 was assigned to this event. Protest reports the fill and vent pipes were then excavated and replaced, a total of 51 drums of contaminated soils were generated during this remedial work. A total of seven endpoints were reported to have been collected following remedial work. Suction and vent pipes were then replaced - the new suction line was installed within a double wall pipe as part of upgrade. Following piping replacement project a new system test was performed on 6/9/00 which passed. A review of Spill file 0002384 reveals no endpoint sample reults or disposal manifests are included with DEC records. Documentation provided by PW Grosser include subsequent passing tightness tests on 6/2/05, 6/2/10 & 4/9/12. Based upon the documentation provided by ProTest no further action is required associated with Spill #9711366.

Remarks: tank test failure of generator tank no spill unknown further action at this time

Modified By:	MJGRIFFI
Last Modified:	05/09/2022
Material Name:	diesel

Tank Number:	003
Tank Id:	47121
Material Code:	0008
Common Name of Substance:	Diesel

Equipment Records:

A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
E00 - Piping Secondary Containment - None
F01 - Pipe External Protection - Painted/Asphalt Coating
K00 - Spill Prevention - None
C03 - Pipe Location - Aboveground/Underground Combination
G01 - Tank Secondary Containment - Diking (Aboveground)
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
J02 - Dispenser - Suction Dispenser
L00 - Piping Leak Detection - None
I04 - Overfill - Product Level Gauge (A/G)

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	03/01/1982
Capacity Gallons:	275
Tightness Test Method:	-
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	10/25/2016

Tank Number:	004
Tank Id:	267139

Equipment Records:

F00 - Pipe External Protection - None
A01 - Tank Internal Protection - Epoxy Liner
B01 - Tank External Protection - Painted/Asphalt Coating

MANHATTAN EYE HOSPITAL - TTF (Continued) **U003074986**

D01 - Pipe Type - Steel/Carbon Steel/Iron
E00 - Piping Secondary Containment - None
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
I02 - Overfill - High Level Alarm
K01 - Spill Prevention - Catch Basin
C01 - Pipe Location - Aboveground
G01 - Tank Secondary Containment - Diking (Aboveground)
J02 - Dispenser - Suction Dispenser
L00 - Piping Leak Detection - None

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service

DEC Region:	2
DER Facility ID:	293352
Latitude:	40.7641900
Longitude:	-73.9788590
DEC Memo:	Tank Test Failure (550 gal tank) in small co-op building Tank Test Failure letter sent to: 125 West 56th St. Corp. C/o Joyce Glowachuck - Apt 5A 125 West 56th St New York, NY 10019 8/2/05. J.Krimgold spoke to Jim Melnik (Pro Test 631-321-4670). The ullage portion of the tank failed the test. Suspected that the problem is in the fill line. The line runs under the floor of the first floor appartment. Line was isolated from the tank and the tank passed the test. Now they will test the line separetely. 10/28/05: Reassigned from J.Krimgold to S. Kraszewski. 10/31/05: S.Kraszewski spoke with Ted Dros (718-815-6292) from Pro Test for more information about diagram. Says that he last spoke with either Treasurer or President of the facility at the end of August and is not involved with this spill any further. He is not aware of pipe location between fill line outside facility and the tank room inside the facility due to obstructions from apartment. Said to contact President of CO-OP facility, Joyce Glowe for more information (212-247-6668). 10/31/05: S.Kraszewski spoke with Joyce Glowe, President of 125 W 56 Street Corp. Another consultant has been hired to do work at site because Pro Test was too expensive. The Treasurer has been handling this process but records do not indicate change of consultant or person in charge. Work on site may be scheduled as early as this week. Waiting for Glowe to respond back with contact info. 11/01/05: S.Kraszewski spoke with Andrew Leung of Yu & Asscociates (cell #201-310-2501). He will forward email with updated information that was also sent to J. Krimgold. Basically, a contractor has already been hired to remove contaminated soil around remote fill port. Plans on coordinating with Con Edison to do the conversion to natural gas. Wants the tank decomissioned first before work starts. 11/04/05: S.Kraszewski spoke with Joyce Glowe (212-247-6668), President of 125 W 56th Street Corp regarding who owns the facility. She explained that since it is a Co-op, a board of directors (5 memebers) vote on proposals dealings with this Co-op. Owner title: 125 West 56th Street Corp. 11/07/05: S.Kraszewski spoke with Andrew Leung of YU & Associates. Jake Krimgold gave verbal confimation for the Scope of Work plans prepared by consultant. DEC approval letters addressed to Ms. Glowe was also sent to Mr. Leung. 12/01/05: Spoke with Mr. Andrew Leung of YU & Associates. Checking status of spill and remediation work start date. Andrew told me that due to ConEd conversion of oil to Natural Gas for housing unit that the tentative schedule for work to begin has been pushed to January 2005. He also mentioned the holiday season being a factor for stalling plans. 01/26/06: Recieved notification of work from Don Carlo Environmental Services Inc., along with the Site Specific Health and Safety Plan for Subsurface Investigations via fax. Proposed work is to begin January 30. The contact is Danny Singh. - SK 01/27/06: Danny Singh from Don Carlo Environmental called. I told

GLOWACHUCK HOME (Continued) **S106971976**

him that the Health and Safety Plan looked fine. He said he needs to check with the RP about a start date and then he'll let me know. About 5 minutes later he called back and said on Tuesday, January 31 at 9:30AM they would be starting work at the site. - SK 01/31/06: Visited the site with J.Kolleeny and Q.Abidi to watch excavation of fill port and observe post excavation sampling. Met with Ted Yen from Don Carlo Environmental. Noticed olfactory and visual contamination upon arrival. Roughly a 4' by 4' section of sidewalk was removed and the excavation was being performed manually since no backhoe was allowed. Also, they could only excavate half of the sidewalk because pedestrian traffic must be allowed by. The contaminated material was removed by bucket into 55 gallon drums onto a flatbed truck for disposal. A PID reading of 35ppm was the highest reading so far. Workers eventually encountered bedrock at 3 fbg, similar to the borings performed earlier (refusal between 2 and 3 feet.) More noticeable contamination the farther they dug. Ted Yen called the office later explaining that they could not advance excavation beyond the firehydrant directly to the East of the fill port because they encountered utility lines. He told me they would take four end point samples, one from each wall of the excavation. He will call me in the morning once they resume work. - SK 02/07/06: Danny Singh from Don Carlo Environmental called asking about proper test method for the air sample they collected. I told him they must use EPA protocol for petroleum VOCs. He said the report would be complete very soon. - SK 04/06/06: Called Andrew Leung's cell, left a message to call back. Andrew returned my call with information about the report. The consultant, Don Carlo, sumbitted a draft to Andrew, but the report contained some discrepancies and errors so it was sent back. In addition, another round of air sampling is being performed to recheck the ambient air for VOCs. The soil excavation samples and both rounds of air samplings will be included in the report. For now, he is Emailing me the soil results. - SK 04/24/06: Reviewed Subsurface Remediation Report submitted by Don Carlo Environmental Services, Inc. on April 21, 2006. Lab results from 4 soil excavation samples reveal low levels of VOCs in two of the four samples: Benzene at 66ppb - 200ppb and Xylenes at 1700ppb- 3000ppb. Two separate air samples, one taken during excavation activities and the other a month after show no organic vapors in the first floor apartment located next to the boiler room. All piping was cleaned, filled and capped. Several drums of contaminated soil was disposed of properly. Since bedrock was encountered only several feet below the surface the likelyhood of the remaining contamination finding a receptor pathway is very low. - SK 04/25/06: After consulting with J.Kolleeny and K.Tang the remaining subsurface contamination poses no threat to the environment or public health. The lack of impact and possible receptor pathways characterizes this site as low risk. NFA letter to be sent out. Closed out. - SK

been following up with AllBoro Tank Testing, cc d here, as they were the company hired by my predecessor to complete the work. They ve advised they re awaiting documentation from some agency. (not certain which one, perhaps they can clarify). Will any amnesty be given? Anything you can do to help? Thanks, Peter Kocaj Account Executive Peter Kocaj Account Executive Gerard J. Picaso Division Halstead Management Company LLC 770 Lexington Avenue, 7th floor New York, New York 10065 Main Number: 212-508-7272 Direct Number: 212-327-9117 E-fax Number: 212-508-6238 Email: pkocaj@halstead.com Need to clarify regarding amnesty mentioned in the email. AD 03/24/2020: Called and spoke with Mr. Kocaj. Found out that he meant extension of the deadline for report submittal. Assured him that extension will be given. Mr. Kocaj will rewrite his request and will indicate for how long the extension should be. AD 03/25/2020: Received the following email from Mr. Kocaj: Ainura Hope all is well. I ve been following up with AllBoro Tank Testing, cc d here, as they were the company hired by my predecessor to complete the work in 2015. They ve advised they re awaiting documentation from some agency. They ve assured me that the work was completed and my predecessors saved emails confirm that, as well. They were in the process of locating some necessary paperwork when the Covid 19-Quarantine was enacted. The quarantines causing a hardship in ascertaining the paperwork and hence we formally request and extension of the submission deadline. Any leniency that could be given would be greatly appreciated. Perhaps a June deadline would be acceptable? Clearly, that would be contingent on the longevity of the social distancing- quarantine issues were all facing. I appreciate your cooperation & look forward to hearing from you. Thanks, Peter Kocaj Account Executive Sent him the following email: Dear Mr. Kocaj, The NYSDEC had received your request to extend the deadline for report submission for the above-referenced site due to the enactment of the statewide Covid 19-Quarantine which is causing a hardship in ascertaining the necessary paperwork. The Department approves your request for deadline extension. New deadline for report submission is July 1, 2020. Feel free to contact me if you have any questions or comments regarding this matter. Sincerely, Ainura Doronova - Environmental Engineer AD 06/10/2020: Received the following email from Mr. Schatzer: Good morning Ainura trying to close out this spill please tell me exactly what I need to send you to satisfy this closure Milton Schatzer Service Manager 95 New Dorp Plaza, 2nd floor Staten Island, NY 10306 (p) 718-489-4244 (f) 718-979-0230 Email: milton@allborotanktesting.com Sent him the following email: Dear Mr. Schatzer, This spill (NYSDEC Spill No. 1409199) was reported due to a failed tank tightness test/vent line leak in December 2014. According to our records, repairs and retest of the tank had being scheduled. However, the Department did not receive any documents confirming that these activities were performed at the site. You should submit such documents (invoices, confirmation letter, contract) from the company which was hired by you to do repair and retesting of the tank. Feel free to contact me if you have any questions or comments regarding this matter. Sincerely, Ainura Doronova AD 06/11/2020: Received the following email from Mr. Schatzer: Hope this will help in closing out report, please call me if not. Milton Schatzer Service Manager 95 New Dorp Plaza, 2nd floor Staten Island, NY 10306 (p) 718-489-4244 (f) 718-979-0230 Email: milton@allborotanktesting.com It has attached documents for review. Will review. AD 06/18/2020: Reviewed the submitted documents. According to them, on December 10, 2014, All Boro performed a tank

TTF- APARTMENT BUILDING (Continued) **S117395130**

test at the site which resulted in a tank test failure (vent line failed the test). All Boro determined at that time that the 5000-gallon fuel storage tank needed to be cleaned for redoing the tank test. On December 17, All Boro pumped and cleaned the tank and performed a second tightness test. Technicians tested the entire system consisting (1) 5000 gallon UST and all associated piping. The buried tank is 1/4 buried in ground below the surface level. Tank and tank piping passed criteria set forth by US EPA by maintaining the required vacuum testing. Based on the submitted documents confirming that the tank passed the test, after it was cleaned and re-tested, the responsible party asks for the spill case closure. Will discuss the closure request with J. Kolleeny of DEC. AD 06/23/2020: Discussed the closure request with J. Kolleeny. It was decided to approve spill closure request based on the documentation provided. AD

Remarks: Failed test/vent line leak. Repairs & retest being scheduled.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 1/16/2002 - Sangesland spoke with John Kaub (212-715-4277) who is a facilities person at the Marriot Hotel. He said he noticed an oil smell this afternoon and looked in the containment room. There was a small spill of oil (about 2 gallons) coming out of a small hole near the bottom of the tank. Mr. Kaub called Petroleum Tank Cleaners. PTC responded and cleaned the 2 gallon spill and laid out speedie dry to absorb the continued drip. Marriot management is working out hiring someone to drain the tank ASAP and then they will determine if they repair or replace the tank. According to DEC PBS records, the tank holds #2 oil, is 15,000 gallons and was installed in 1978.

DEC Memo:	3/5/07 sent ttf to: Linda Daniel Parkview Assets 98 Cuttermill Road Great Neck, NY 11021 called Linda Daniel (212)628-5203. Tank to be pumped tomorrow. Isolate tank and piping after pumping. Eastmond is contractor. She gave me address for ttf letter. bf 3/27/07 received massage and fax from Rene Lewis of Eastmond. (917)299-7257. Tank was pumped out and cleaned. Hole cut in bottom of tank for sampling (abandoniong in place). Oil and water returned to tank. Tank cannot be removed due to proximity to building foundation. Fax requests approvel of plan. Contaminated soil letter sent to Linda Daniel at address above. I called Mr. Lewis back and told him I will send fax of letter to him. Fax was sent. Received message from Hidesh(?) Patel of Land America Assessment Corp. (732)942-2909. Wants to know if Mr. Lewis called and did we discuss this. bf Dear Mr. Falvey: 5/7/10 Received the following e-mail from Ann Murphy of Parkoff Assets: Our abatement company, Eastmond & Sons, forwarded the attached Spill Closure Report to you on March 10, 2010. Over the past several weeks, I have been trying to get an update on the status of the spill and when we can expect closure. When I phoned your office today, I was advised to re-send the report to you, which I am doing now. I understand how busy you must be, but would appreciate if you could advise when we can expect to have this spill closed or whether you require any additional information in order to do so. I would appreciate any assistance you can give me regarding this matter. Very truly yours, Anne Murphy ---------- bf: Responded to her e-mail with comments: I have reviewed the report dated March 10,

APARTMENT (Continued) **S108467807**

2010 that was prepared by Eastmond & Sons. My comments below refer to the letter, dated March 27, 2007, that I sent to Linda Daniel of Parkview Assets. A copy of the letter is attached. 1. The March 27, 2007 letter requires a letter or report summarizing the cleanup activities, observations, post excavation sampling results (if necessary), and also including contaminated material disposal manifests. The observations and monitoring of the wells are vague. Please summarize the documentation that was provided and provide a description of the monitoring activities. 2. The March 27, 2007 letter states: If the extent of contamination is not clear, the Department requires that you conduct a site investigation and submit an Investigation Summary Report for your review. This report must adequately characterize the site and delineate the full extent of petroleum contamination. There is no discussion of delineation or site characterization in the March 10, 2010. 3. The investigation should involve evaluation of soil and/or groundwater quality. There was no evaluation provided. 4. Please provide conclusions and recommendations requested in the third paragraph of the letter. ---------- 7/7/10 Sent e-mail to L. Hernandez of Eastmond requesting the statuis of the closure report. bf 10/28/10 On 9/30/10 received updated report from Lizette Hernandez of Eastmond. Sampling shows all contaminants either ND or below Soil Cleanup Objectives to Protect GW Quality. NFA. BF

DEC Memo:	01/06/09-Hiralkumar Patel. spoke with Warren Robateau, building super. site has one 5000 gal #2 oil AST in contact with floor. Warren mentioned that oil spilled from fill line. last oil delivery was for 3000 gal on 01/02/09. he also mentioned that there is stain on wall where fill line enters into tank room. currently tank room has about 2 inches of oil/water inside tank room. no odors inside building. management company has hired cleanup company. Warren measured 2882 gal in tank this morning. PBS #: 2-197718. 146 East 49th Street Owners **property owner** c/o Carlton Management **property management** 87-47 Merengo Street Holliswood, NY 11423 Attn.: Steve Schwinder **property manager** Ph. (516) 609-8200 Ext. 11 01/07/08-Zhune spoke to Sheila from Property management (516 609-8200. She said there are people working there. PTC and ABC Tank are coming. 01/07/08-Zhune spoke to Steven Schwinder (516)609-8200, cell (917)747-5866 (Property manager). He said we are working on it. We are waiting for price. A CSL was sent to: 138 Glenwood Rd. Glenwood Landing NY 11547 Att: Steven Schwinder 01/07/08 Steven called to say that PTC has been hired to do the clean up. 01/07/08 Mark from PTC called to say that they get the approval to do the cleanup at 146 east 49th St. They are going to be pumping oil today and will continue with the cleanup tomorrow. 05/15/09-PTC sent the closure report dated 05/13/09. The report included a cover letter, copy of the disposal manifest for the drums, a disposal receipt for the liquid, a site plan and some

APARTMENT BUILDING (Continued) **S109414179**

photographs after the cleanup. The letter stated that on 06 January 2009 an oil delivery of #4 fuel
oil was made to this building. After the delivery the building's superintendant checked the boiler
and tank room and noticed oil on the floor. It is estimated that there was about 100 gallons of the
#4 oil on the ground. The fill line was found to have a separation that caused the spill. The fill
line is from the curb in a small tuunel that at one time served as a coal chute. The tuunel acted
as secondary containment and prevented any oil from impacting the soil. It runs from the curbs,
runs under the sidewalk, enters the tank room and is connected to the top of the 5000 gallon
storage tank in the basement. The fill line was replaced without the need to performed any
excavation of the sidewalk. The interior surface of the coal chute were cleaned and the materials
on the floor was vacuumed into a vacuum truck and legally disposal. The solid materail was placed
into drums for disposal. After all the solid material was removed and as much liquid as possible
removed, the floor was pressure washed. The liquid from this operation was also collected into a
vacuum truck for legal disposal. The floor turned to be a solid concrete surface free of any cracks
or voids. For this reason, no samples were taken. The spilled was #4 fuel oil, not #2 oil as noted
on the DEC website. Spill closed

Remarks: Caller states a line failure caused fuel to spill into the dirt floor. Spill was just discovered and process is ongoing.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL 10/10/95: This is additional information about material spilled from the translation of the old spill file: TTF. 4/12/04-Vought-Spill transferred from Tang to Rommel as per Rommel. 11/29/05 - L. Alden - Site is the block (between 1st and 2nd Avenues and E. 59th and E. 60th Streets) situated beneath ramps to the Queensboro Bridge, formerly owned by York Hunter Construction Co. Refer to PBS # 2-601814. This site MAY be associated or combined with PBS # 2-455784 and spill #9513279, which are for 350 E. 60th Street, the property on the 60th Street side of the block. Search on property address turns up only one parcel for the entire block. Property Shark search found 2 permits associated with the site: 3/9/94 - Conversion of two existing underground 2,000-gal. fuel storage tanks and ancillary systems from gasoline to diesel. Replacement of fuel pumping systems at these two tanks. Abandonment/decommissioning of one 2,000-gal. UST. 11/7/94 - one 550-gal. UST to be removed. One

NYC DEPT OF SANITATION GARAGE ME8B (Continued) **1000981375**

pump island and dispenser to be removed. All as per plans filed herewith. Sent letter to NYCDOT requesting information. Vivian Marcovicci (718-793-7186) called back and informed me that this site is not a DOT facility. I am not totally convinced this is the case, due to the above comments on the other property on the block. Suggested action: attempt to contact the Dept. of Sanitation. 11/16/06 - Austin - Reassigned to Patel for followup/review - end 11/27/06-Hiralkumar Patel. found another open case at this site. spill #: 9513279. Joseph Maison in remediation group working on this case. after discussing with DEC Kolleeny, case closed. refer to 9513279.

Remarks: WILL PUMP OUT TANK -

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was ZHTOMIRSKY Former York Hunter site. PBS #2-455784. YK. 3/09/06: This spill transferred from I. Islam. to Q.Abidi. 06/20/06: DEC Lead transferred from J. Kolleeny to J.A. Maisonave. JAM 6/21/06: Reviewed the Site Specific Investigation Plan proposed by LiRo for this site. URS has assumed management of this project and plans to perform this investigation. This is apparently the first investigative effort to evaluate potential impacts from petroleum USTs at the site. The site has 3 vehicle fuel tanks that were abandoned in place. Also on-site are 2 unregistered gasoline tanks that may have been abandoned in place. The investigation plan proposes drilling six soil borings and four monitoring wells. I spoke to Tim Burmeyer of URS (phone: (716) 923-1115) about the proposed soil borings and made adjustments to the locations of those borings. I will draft an approval letter summarizing the adjustments and comments. JAM 6/22/06: Approval letter for the SSIP was finalized and issued to: Afsar Samani NYC Department of Design & Construction 30-30 Thompson Ave. Long Island City, NY 11101 The letter requested one extra soil boring at the north end of the site to evaluate the fill port for the 2 unregistered gasoline tanks. I am expecting URS to notify me of the work schedule. JAM 7/25/06 Received call from Tim Burmeyer at URS on 7/11/06. He informed us that the NYCDEP will be constructing a Distribution Chamber for a water tunnel in the area where the 3 USTs are supposed to be on the southern end of the site . The NYCDEP performed an environmental assessment on site and did not locate any USTs; however, the area where the USTs were supposed to be will be excavated to bedrock and all soil disposed of when the distribution chamber is constructed. The NYCDEP began drilling pilot holes to the water tunnel on July 24. URS will review files in the NYCDDC archives to see if any maps include the locations of the USTs on the southern

NYC DEPT OF SANITATION GARAGE ME8B (Continued) **1000981375**

and northern ends of the site. URS will amend the SSIP if needed. JAM 8/25/06 Email message from T. Burmeyer of URS. They are scheduled to drill at the north end of the site on September 7 and 8. Work includes 4 soil borings and 1 monitoring well. - JAM 3/21/06 Reviewed Soil and Groundwater Sampling Results - Request for Spill Closure Report submitted by URS and dated Dec 12, 2006. Between Oct 4 and 6, 2006, URS advanced 4 soil borings and installed one well on the north end of the site in the area around unregistered gasoline tanks. During the advancement of each soil boring, PID readings ranged from 0 to 72 ppm and odors were detected. Soil Analytical results indicated that no VOCs were present at concentrations above TAGM. SVOC exceedences were detected at each soil sample. Groundwater analytical results showed that no SVOCs were detected and several VOCs were detected but concentrations were below criteria. URS recommends closing this spill case because no VOCs were detected in soil or groundwater above their respective criteria and SVOCs detected in the soil pose no threat to human health or the environment. I sent URS an email requesting additional information regarding the south end of the site where three tanks were registered. This area is under construction by NYCDEP for a water tunnel distribution chamber. URS will submit an addendum to this report. - JAM 4/27/07 Reviewed Shaft 33B Project Update Report, submitted by URS and dated March 26, 2007. Report summarizes work performed by the NYCDEP to construct a water tunnel distribution chamber at the southern end of the site where 3 2,000-gallon tanks were located. According to the report, 3 USTs were located in the current construction area but were removed by an unknown party before the project was initiated. No end-point samples were taken from the excavation however, the former tank locations and the surrounding area was excavated to bedrock for the distribution chamber. Soil samples taken near the former tank area for characterization prior to construction were analyzed for VOCS and SVOCs. No VOCs were detected and some PAHs were detected but are common of fill material. This information is located in the appendices of this Report. URS requests closure of this spill case. Since the area surrounding the USTs in the southern portion of the site was excavted it is likely that if any contamination was present it has been removed. This spill poses no threat to human health or the environment and was closed. An NFA was issued today. - JAM

Remarks: tank leaked causing the spill.contimanited soil found by borings.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 5/7/03 - ROSSAN, DDO - Called Ray Lara, who confirmed that he was informed of the spill by Stuyvesant Fuel. Clean-up crew has been dispatched. Called Mr. Tesanovic at the spill site who confirmed that spill is contained in basement, tank room. Called Mistic Transportation, who confirm that spill is in basement. Discussed with Steve, who decided to visit spill site. END
Remarks:	Above material spilled at above location due to tank overfill. Material did possibly runoff into storm sewer. Crew is responding to location for cleanup.

DEC Memo:	5-6-14 Dupigny - Notes form Sangesland Essex House Hotel psb coutact 2-107441 will Armstrong 212-484-5163 1/2/15-Vought-Vought received call phone message from Shaz from JW Mariott (Ph:917-528-7538) who was looking for more information on spill. NOTE: Vought never received notification of assignment of this spill from DEC Duty Desk officer and as such has not worked on spill to date. Vought noted current PBS #2-107441 that shows a 19,000-gallon #6 fuel oil AST contact with soil and owner is: Mr. Will Armstrong Jumeriah Essex House Hotel 160 Central Park South New York, NY 10010 PH: (212)247-0300 Vought called and spoke to PTC Salamack (spill caller) for more information. PTC Salamack noted that the cause of the tank failure was a compression fitting vent alarm and the compression fitting is present in the vent pipe and was replaced with a standard threaded nose replacement. PTC Salamack noted that the failure was above the UST and their was no contamination noted. Spill closed by Vought and Vought called Shaz from JW Mariott and left him message informing him of same and requesting a return call if he needed any spill closure documentation.
Remarks:	Emptied tank then tested it

DEC Memo:	06/08/10 - LZ A certified TTF letter (eDocs) was sent to Michael Feeley. 11/26/08-Vought-Off hours responder. Spill assigned to DEC Krimgold as per DEC Krimgold as TTF of PBS site. Called Dan Porter/Shawn Kerrigan ((610) 278-7203) from Crompco and left message to return call to DEC with what portion of the tank failed and further action by owner. Vought called and spoke to Avis (Mr. Feely) who confirmed below mailing information. Vought sent TTF Letter to mailing address as per PBS #2-511781 that shows three (4000-gallon) gasoline USTS onsite: Mr. Michael Feeley Avis Rent A Car System, Inc. 6 Sylvan Way Dept. 29-093-36 Parsippany, NJ 07054 Ph:973-496-3467 Fax:973-496-3441 12/22/08-Vought-Received call from Phil Eangle (AVIS 973-496-6942) and he ran two line tests and did hydrostatic tests as well that were inconclusive. Another test will be performed on 1/30/09 and results will be sent to DEC by 3/1/09. Tank is concrete

encased steel line and discharge line is point of failure. Line to remote fill tested tight. 07/16/13 - Spill Case is transferred from Leszek Zielinski (PBS Unit) to V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 11/05/2013 - V. Brevdo Called Shawn Kerrigan of CRMPCO at 610-278-7203. Shawn does not have direct knowledge of the open spill case and provided name of Phil Engle of Avis - 973-496-6942. I left message on Mr. Angles's voice mail that I want to discuss open TTF spill case with him. Mr. Kerrigan advised me that Avis's current consultant is Jade Environmental. VB 11/12/2013 - V. Brevdo Mr. Philip Engle of Avis returned call and we discussed the spill case. I forwarded Spill Report and TTF letter, attachments to an e-mail: November 12, 2013 Dear Mr. Engle: Thank you for discussing the subject spill case with me earlier today. As per our conversation, attached to this e-mail are (1) Spill Report and (2) Department's June 8, 2010 letter to Mr. Michael Feely of Avis Rent A Car System, Inc., which explains the nature of information / documents that shall be provided to the Department to rectify this open spill case. As I explained to you over the phone, I need to understand whether this tank test failure was due to dry (ullage) leak or actual oil discharge /release from the tank occurred, and if soil / groundwater have been impacted. I am requesting that you obtain and provide the Department with information / documents listed in the June 8th, 2010 letter or any other relevant information which could help to understand the nature of this tank test failure. I look forward to work with you and your company on addressing this open spill case, develop appropriate course of action, if need be, and accomplish closure. I would appreciate if you could get back to me within 2-3 weeks from today. Sincerely, Vadim Brevdo 01/28/2014 - V. Brevdo E-mail: January 28, 2014 Dear Mr. Engle: I hope all is fine with you. Did you have a chance to review this spill case? I recall we agreed that you will get back to me on this matter within 2-3 weeks of November 12, 2014. I look forward to work with you and your company on addressing this open spill case, develop appropriate course of action, if need be, and accomplish closure. Thank you, Vadim Brevdo 02/18/2014: e-mail to Avis: February 18, 2014 Dear Mr. Engle: The Department is seeking to resolve this outstanding open spill case with Avis in a meaningful manner. If I do not receive the information in question from you (Avis) in a timely manner, within two weeks from today, I will have no choice but referring this case to the Department's Office of General Counsel for legal enforcement action against Avis. Please let me know of Avis' intentions regarding this matter. Thank you, Vadim Brevdo VB 02/24/2014 e-mail from Avis (Mr. Philip Engle): Mr. Brevdo, The attached letter was sent via certified mail to your attention today. Feel free to contact me w/ any questions. Thank you. Phil Engle Engineer Environmental Affairs - Corporate Design & Construction Avis Budget Group, Inc. 6 Sylvan Way, Parsippany, New Jersey 07054 Tel: 973.496.6942 Cell: 973.727.7676 Fax: 757.493.6544 philip.engle@avisbudget.com 02/24/2014 e-mail to Mr. Philip Engle of Avis: February 24, 2014 Mr. Engle: This is to acknowledge receipt of your 2/24/2014 2:26 PM e-mail and attached February 24, 2014 letter, including tightness test results and spill case closure request. I will review submitted documents and get back to you within 7-10 business days. Contact me if you have questions. Thank you, Vadim Brevdo VB March 3, 2014 - Spill Case Closure Decision - V. Brevdo Spill Case Closure Decision Avis Rent A Car System, LLC 153 W 54th Street New York, NY PBS #2-511781 Spill # 0809611 Review of this tank

AVIS CAR RENTAL (Continued) **S109374706**

test failure spill case reveals the following: Spill was reported to DEC on November 25, 2008 due to failed integrity test associated with the UST located in the basement of the property located at 153 W 54th Street, Manhattan. Avis operates a UST system at this facility consisting of three (3) USTs which are located in the second basement of the building are are connected by a siphon to operate as one system. Each UST is 4,000 gallon double-wall steel STiP3 construction with original sacrificial anode cathodic protection. The product piping is aboveground and is constructed of single-wall steel. The piping is also equipped with original sacrificial anode cathodic protection. A Veeder-Root TLS-350 monitors the interstitial space of the tanks and the tank top sump where the product pump is located on the middle tank. There is an Incon electronic line leak detector installed on the product piping. On November 25, 2008, Crompco, LLC performed a Petro-tite line test which failed. On December 11, 2008 Crompco returned to the site and performed an EZY-3 tightness test which passed. The test results have been submitted by Avis on February 24, 2014 to the NYSDEC. Also, the product piping for this system was replaced in 2012. Avis did not perform analytical sampling since there was no impacted soil or groundwater. Since there was no release to the environment and the UST system has passed tightness testing, Avis requested closure of this spill case on February 24, 2014. Review of PBS #2-511781 records demonstrates that all three tanks at this address have received PBS certificate on 05/11/2012 which expires on 05/11/2017. Review of the Spill Report records did not reveal any product release or loss from the system. No threat to human health and/or the environment. The Department concurs with the 2/24/2014 spill closure request by Avis. Spill is closed effective March 3, 2014. Vadim Brevdo

DEC Memo:	Sangesland spoke to Joyce Rizzo at JD2 Environmental. Initial cleanup was done. They are working on the repairs. Will call back with update. Sangesland forwarded to her a copy of the prior spill reports for the site that showed old problems (all old spill numbers were closed out). 11/13/11 Rec'd closure report from JD2 Environmental.Testing of the piping with line leak detector did not find any leak on the piping and there was no evidence of damage to any of the visible portion of the piping.On Jan 04 2011,the area of the piping inside the building floor at the street level near the dispenser was excavated and it appeared that the piping failure was inside the floor area where the piping turns from vertical to horizontal.Repair options for the piping are now being evaluated. No sampling was done as there was no soil/ground water impact.Since there was no release to the environment,AVIS requested closure of the case.(sr)

DEC Memo:	10/18/12 TJD T/C with Greg Collins @ GC Environmental. Conversion from #6 >> #4 Fuel Oil. 15K AST tested after cleaning failed tightness test when empty. Discharge of #6 Oil was evident inside secondary containment (tank room). Product was scraped, floor was degreased and contaminants were drummed for disposal - unknown volume of discharge. Concrete floor reported in good condition with no cracks or drains reported. Hole in bottom of tank noted. GC Environmental has subcontracted with WCC Tank Technology of Newburgh (845 564 9555) for relining tank with fiberglass. DEC informed Greg Collins that PBS registration must be updated to reflect changes &

APARTMENT BLDG - TTF (Continued) **S112148848**

appropriate standards must be followed in application and installation of proposed liner. A minimimum of (3) soil borings must be performed along centerline of tank bottom to a minimum depth of 5 ft bgs - samples should be field screened with a PID and endpoint samples are required to be analyized at NYS ELAP approved laboratory utilizing EPA methods 8260/8270. Following completion of repairs and prior to filling tank with product a system test must be performed. Greg was directed to provide DEC with an update of any significant findings identified during subsurface investigation prior to backfill. Photographs, boring logs, laboratory reports, and copies of both initial failed tank test and final tank test are required as part of closure documentation. 2/11/13 TJD File review. Greg Collins (GCI Environmental) was notified via e-mail that closure report submitted was missing required information. As per DEC directive, consultant was required to include copy of failing tank tightness (dated 7/25/12) and following repairs to tank a system tightness test is reuired. Documentation contained in closure report does not include original failing tightness test and the 10/23/12 tightness test is listed as a tank only test. In addition, the PBS registration application contained in closure report does not accurately reflect tank sytem currently in operation. GCI has been requested to investigate discrepencies and resubmit an ammended closure report. Awaiting revised report. 3/7/13 TJD File review. Revised report has been received. Initial failing tightness test is for a wet leak . A total of (3) soil borings were performed along centerline beneath AST - laboratory analysis of collected samples are within acceptable limits - minor exceedances for (7) SVOC compounds are noted. Missing documentation has been provided. As per GC Environmental report and revised PBS registration application the tank has been relined. PBS registration included with revised report still appears to contain information inconsistent with tank system in operation at facility - PBS unit (BF) has been informed of potential discrepencies and will perform the necessary follow-up if warranted. No disposal manifests were provided for disposal of drummed waste generated by GC Environmental during remedial work performed in September 2012 as detailed in closure report. No further action is required at this time.

Remarks: Test failure. Repair or replacement is pending owner’s action.

DEC Memo:	TTF letter sent to: Property Manager 857 Fifth Ave Owners Inc. 857 5th Ave. New York, NY 10021 3/31/2016: Rashad Spill reassigned to DEC Omar as per DEC Vought. 4/4/2016: Rashad 857 5th Avenue has an alternate address of 1 East 67th Street. No additional spills found for site, PBS# 2-281484 found for site there is a 7500 gallon #6 fuel oil AST in contact with soil. Joseph Walsh's email from PBS application is jwalsh@gumleyhaft.com. No documents found in D2. 5/23/2016: Rashad Sent email to Rob Hill: I have a tank test failure for a 7500 gallon tank at the above referenced site called in on 4/10/2013. Please let me know if you ever retested and if you have a passing tank system test for this site. Thanks. 11/30/2016: Rashad Sent email to Joseph Walsh: I am contacting you in regards to 857 5th Ave for a tank test failure that was reported in 2013. I would like to close out this case however I need a passing tank test that was conducted after the reported spill date (4/10/2013). I have already reached out to the contractor who reported the spill, Riteway,

ABOVE GROUND TANK (Continued) **S113494259**

however I have not heard back from them. Thanks. 1/17/2017 Austin This spill report is being transferred from Rashad Omar to Kumar Patel end. 06/22/17-Hiralkumar Patel. alternate address: 1 E 67th St no other spills found. PBS #: 2-281484. as per PBS record, the site has one (1) 7,500 gal #6 oil AST in contact with soil, in-service, installed in Dec. 1985. 2:00 PM:- visited site. doorman showed location of two tanks at the site: one (1) 7,500 gal #2 oil AST (square tank) in northwest portion of the building and one (1) 275 gal diesel AST (for emergency generator) in southeast portion of the building. no signs of spill noted around both tanks. doorman mentioned that National Boiler performed fuel grade conversion in 2013 and they have all the documents. 2:24 PM:- left message for Harry Smith, property manager. 2:42 PM:- left message at National Boiler. 857 Fifth Avenue Owners Inc. **property owner** c/o Gumley Haft 415 Madison Avenue New York, NY 10017 Attn.: Harry Smith Ph. (212) 371-0456 email: hsmith@gumleyhaft.com 06/23/17-Hiralkumar Patel. 9:20 AM:- received message from Mr. Smith. 10:26 AM:- left message for Mr. Smith. 10:31 AM:- spoke with Ms. Mahon at National Boiler and asked her to submit documents regarding cause of tank system failure, actions taken, cleanup of any petroleum release and system test result after repairs done. Meaghan Mahon National Boilers PH. (201) 488-5151 Ext. 122 email: mmahon@national-mechanical.com 10:42 AM:- sent email to Ms. Mahon and asked her to submit required documents. email copied to Mr. Smith. 07/24/17-Hiralkumar Patel. 3:11 PM:- sent email to Ms. Mahon and reminded her to submit required documents for review. email copied to Ms. Smith. 08/01/17-Hiralkumar Patel. 1:05 PM:- left message for Ms. Mahon. 1:07 PM:- left message for Mr. Smith. 1:25 PM:- sent TTF letter, including PBS application/instructions, to Mr. Smith requiring immediate renewal of PBS registration and submission of TTF investigation/remediation report by the end of 09/08/17. letter emailed to Mr. Smith and Ms. Mahon. 09/05/17 - Lakhani Emailed Meghan Mahon and informed her that there are a few more items needed for spill closure, including a passing tightness test and any other cleanup documents (i.e. cleanup summary, disposal manifests). Furthermore, she must also send a PBS application for registration renewal because it expired in July 2017. 09/18/17-Hiralkumar Patel. received email from Ms. Mahon (at 1:36 PM on 08/15/17) including affidavit about tank repair. as per the letter dated 07/15/13, a new bottom was welded on existing aboveground tank and tank was tested tight after repairs. 11:36 AM:- sent email to Ms. Mahon including copy of letter dated 08/01/17. asked her to submit required documents/information. also asked her to immediately renew PBS registration. email copied to Mr. Smith. 11/10/17-Hiralkumar Patel. 1:55 PM:- left message for (and sent email to) Mr. Smith and asked him to submit required documents for review. email copied to Ms. Mahon. 11/16/17-Hiralkumar Patel. 2:03 PM:- received email from Ms. Mahon including a letter from Riteway and tank system test result. David from Riteway mentioned that the tank system failed a test in 2013 due to a leak at tank bottom. the tank was empty during the test in 2013. David confirmed that there was no contamination present. a new tank bottom was welded. the tank system was tested tight on 10/05/17. 11/17/17-Hiralkumar Patel. case closed based on available information. 10:36 AM:- sent spill closure letter, via email, to Mr. Smith and Ms. Mahon.

Site Description: "Location: The East 60th Street Con Ed Steam Station Site is located in an urban area of New York County (Manhattan) in New York City. The site is partially located beneath the elevated section of the Ed Koch Queensboro Bridge (also known as the 59th Street Bridge) between East 59th and East 60th Streets. Site Features: The Site consists of the interior basement floor of the building which occupies the site. Current Zoning/Use(s): The on site building is in use as a steam generation plant by a utility company which distributes steam to utility customers. The Site parcel is in a manufacturing zone, with commercial zoning to the west and north, and residential zoning to the south of East 59th Street. The surrounding properties are currently used for a combination of uses, with a park/playground to the north across East 60th Street, residential to the south across East 59th Street, a Department of Transportation yard adjacent to the west, and the FDR Drive (hgihway) to the east. Further to the east is the East River, which is the receiving waterbody for the facility's SPDES discharge. Historical Uses: Prior uses that appear to have led to site contamination potentially include the use of mercury-filled flow measurement equipment as part of the steam plant operations. Upon finding mercury in the facility's SPDES discharge sampling, a report was made to the Department's Division of Water and subsequently a report was made to the Department's Spill Hotline upon finding mercury beads in the facility's internal drainage system. Site investigations were undertaken under the spill program to delineate areas of mercury contamination. Remedial measures were implemented including excavation of impacted media and encapsulation of the basement floor and components of the drainage system with a two-layer epoxy coating."
Env Problem: "Nature and Extent of Contamination: The primary contaminant of concern at the site is mercury. Investigations initially identified mercury in the facility's SPDES discharge, which prompted the investigation of potential source areas. The presumed principal source area identified was the floor trench drainage system, which is a concrete-lined floor trench to which various equipment within the facility discharge wastewater from the steam plant operations and through which this wastewater is conveyed toward the facility discharge point. Some sections of the trench were found to be in disrepair with cracked and or spalling concrete. Liquid mercury was observed in two separate locations in the trench system. Additional investigation with sampling identified mercury concentrations above

EAST 60TH STREET, CON ED STEAM STATION (Continued) **U003394420**

industrial use recommended soil cleanup objectives in soil beneath and in the vicinity of the floor trench. In that an additional goal of the remedial effort was to prevent mercury contamination from being discharged through the facility's SPDES dicharge, additional sampling was conducted to identify other possible sources of low concentration sources of mercury including the concrete floor itself and the paint on the floor. Remediation at the site is complete. An estimated 4.5 pounds of liquid mercury were removed from the two areas in the trench system where it was found. Approximately 4.3 cubic yards of mercury-impacted soils and concrete were also removed from the trench areas. An additional 15 cubic yards of concrete were removed during activities to repair spalling concrete and repair of concrete slab areas beneath the boilers. The facility owner decided to apply a two-coat epoxy system to the entire floor area and the trench system to minimize to the extent feasible the release of mercury through the facility discharge. To apply the epoxy, the floor area needed to be scarified; the paint chips and concrete generated in this process were removed in 22 55-gallon drums. Waste water generated from dust control or washing activities was containerized in fractionation tanks and removed for offsite disposal. In addition, the facility oil water separator and structures were cleaned and/or repaired until analysis demonstrated that mercury concentrations were less than 50 parts per trillion in water passing through the system, per the Department's Division of Water's requirements."

Longitude:	-73.9587404
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 1/23/04 TJD Dave Yudelson called concerning site. A property transfer is pending on site. A work plan is being prepared by PW Grosser to investigate if any leak occurred from this tank. Dave states repairs and retest of tank occurred but is unable to produce any documentation. 10K UST tank is located beneath center of building, inside. The work plan will propose three borings along tank centerline. 2/5/2004 Sangesland spoke to Robert Bertlesman (leaseholder) He says the tank is in service and is under the floor in the middle of the building. Sangesland informed him that use of the tank was against the law until the spill number is closed out. The soil borings which are needed can be done adjacent to the tank, but a Test Plan for the location of the borings would need to be submitted to Tim DeMeo for approval prior to the work being done. Sangesland faxed a copy of this spill report to Mr. Bertlesman. 2/19/04 TJD Attorney Dave Yudelson (representing owner) contacted Demeo regarding access problems with site tenant (RCN). Dave states building owner wants to move forward with an investigation but tenant will not provide access. He further states that tank is still in use after failing the tightness test in September 2000. Standard TTF letter mailed to registered owner and faxed to Yudelson @ 212 906 9032. 3/18/04 TJD Tank test performed - passed. Subsurface investigation performed revealing low level SVOC contamination likely caused by historic fill. Site does not meet standards. Spill closed.
Remarks:	TYREE WILL MAKE REPAIRS AND CROMPCO WILL LATER RE-TEST.

Updated By:	BXANDERS

Site Description: "Location: The site is located at 1299 First Avenue in the Borough of New York, New York. It is located on the western quadrant of the intersection of East 70th Street and 1st Avenue. The site is surrounded by residential apartment buildings to the north and west with mixed commercial/ residential buildings to the south and east. The Site is designated as Block 1444, Lot 30. Site Features: This 1957-square feet site is developed with a 4-story mixed use commercial/ residential building. The first floor is used as a convenience store with the basement used as storage. The site is surrounded by residential and commercial buildings. Current Zoning/ Uses: The site has a zoning code of C2-8, which allows mixed residential and commercial usage. The current use of the site conforms to the zoning code. Historical Uses: Former Nu Brite Cleaners, a dry cleaning facility (EPA Generator ID NYD981075039), occupied the commercial space. The former dry cleaning operations may have contributed to the known contamination found in groundwater. Site Geology and Hydrogeology: The site?s elevation is approximately 50 feet above mean sea level. The vicinity of the Site is characterized by metamorphosed sequences of bedrock overlain by Pleistocene-aged glacial till deposits. The regional groundwater flow direction in the vicinity of the Site is toward the east-northeast, in the direction of the East River. The depth to water at the Site ranges between 15 and 16 feet below grade."

FORMER NU-BRITE CLEANERS (Continued) **S113916767**

Env Problem:	"Nature and Extent of Contamination: Based on the investigations conducted to date, chlorinated solvents are known to present in the subsurface. These contaminants are impacting soil and groundwater. Previous investigations include two rounds of soil sampling events in November 2007 and August 20008 in addition to two Groundwater Investigation Reports dated May 2010 and July 2010. Soi l- Chlorinated volatile organic compounds (cVOCs) such as tetrachloroethene (PCE) and trichloroethene (TCE) were detected in groundwater. PCE at 12,000 ppm was detected on site at SP-2. TCE at 3.1 ppm, PCE at 1,000 ppm were detected on site at SP-5. These concentrations exceeded applicable standards. The presence of chlorinated VOCs in soil is most likely due to former operation of the dry cleaner. Groundwater - cVOCs such as PCE, TCE, cis1,2-dichloroethene (cis 1,2-DCE), and vinyl chloride (VC) were detected in groundwater. TCE at 120 ppb, PCE at 3,300 ppb, and cis 1,2-DCE at 140 ppb were detected in on-site MW-1 exceeding applicable standards. In addition, vinyl chloride was detected in cross/downgradient, off-site well MW-4 exceeding applicable standards. MW-3 was dry during the sampling event. The presence of chlorinated VOCs in groundwater is most likely due to former operation of the dry cleaner. Significant Threat: NYSDEC has determined that this site poses a significant threat to the environment."

Town:	New York City
Record Added Date:	04/02/2013
Record Updated Date:	07/09/2018
Update By:	JHOCONNE
Site Description:	"Location: The site is located in a commercial and residential area of the Upper East Side section of the Borough of Manhattan. The site is an approximate 1,957 square foot (.0449 acre) rectangular parcel making up the entirety of a tax lot identified on New York City tax maps as Block 1444, Lot 30. Block 1444 is bound to the north by E 70th Street, to the east by 1st Avenue, to the south by 69th Street, and to the west by 2nd Avenue. South and west adjacent properties include mixed use commercial and residential buildings. To the east is 1st Avenue beyond which are also commercial and residential buildings. To the north is E 70th Street beyond which is a senior center. Site Features: The site is currently developed with a 4-story commercial/residential building (measuring approximately 25 x 65). The basement depth is approximately six feet (ft) below sidewalk grade (bsg) and is divided into two sections. Two 275-gallon above ground storage tanks (ASTs) containing number two fuel oil are located in the western section of the basement. Within the footprint of the site is a separate one-story building (measuring approximately 12 x 25) located west of the main site building. There is a small (10 x 20) space located beneath the one-story building that contains a boiler thought to service both on-site buildings. Current Zoning and Land Use: The Site is currently zoned C2-8 (commercial districts that are predominantly residential). The first floor of the main building is utilized as a convenience store and pharmacy while the basement is used for storage. Residential units occupy floors two through four. The separate 1-story building is occupied by a surgical and brace supplier. Surrounding properties include mixed use commercial and residential buildings to the south, west, and east; and a senior center to the north. Past Use of the Site: Historic Sanborn Maps indicate that a drycleaner was present on-site between 1976 and 1996. City Directory search records list a drycleaner (NU Brite Cleaners) in operation at the site between 1950 and 1988. Nu Brite was identified as a Resource Conservation Recovery Act (RCRA) Non-Generator of hazardous wastes between 1999 and 2007. Between 2000 and 2005, the rear portion of the commercial space was leased to Global Entrepreneurship Inc., which provided dry cleaning services with off-site dry cleaning operations. It is unclear if the rear portion of the commercial space refers to the small one-story building located west of the main building or to another section of

FORMER NU-BRITE CLEANERS (Continued) **S113916767**

the main commercial space. The site was utilized as an auto body repair shop from 1927 to 1942. Site Geology and Hydrogeology: The site is fairly level and located approximately 50 feet above sea level (NGVD 1988). The shallow subsurface of the site consists of a mixture of fine to medium sands and silts with medium, sub angular gravel. Minimal debris (concrete and brick) was encountered during performance of a Remedial Investigation (RI). Native soils include occasional sandy clay lenses that are present around 15 to 20 feet below sidewalk grade (ft bsg) along with weathered gravel, quartz and schist. Bedrock geology in the vicinity of the Site is characterized as the Hartland Formation (Middle Ordovician to Lower Cambrian). The Hartland formation consists of interbedded units of fine grained quartz feldspar, fine to coarse grained quartzofeldspathic, muscovite biotite garnet schist, and quartz biotite hornblend amphibolite. Depth to bedrock was encountered at approximately 29 ft bsg. Groundwater is typically encountered approximately 15 to 20 feet below ground surface. Regional groundwater flow is east northeast towards the East River which located approximately 1,500 feet to the east."

Env Problem: "Nature and Extent of Contamination: Based on the investigations conducted to date, the primary contaminants of concern at the site are chlorinated solvents (PCE, TCE) and its breakdown products. on site oil, groundwater and soil vapor are impacted by these contaminants. Soil - PCE and its breakdown products were detected in soil at concentration exceeding the unrestricted SCO with maximum PCE concentration of 12,000 parts per million (ppm). TCE was detected at a maximum concentration of 3.1 ppm Groundwater - PCE and its breakdown products were detected in groundwater at concentration exceeding the groundwater standard with a maximum concentration of PCE at 5,500 parts per billion (ppb), TCE at a maximum concentration of 590 ppb, and cis 1,2-DCE at a maximum concentration of 3,000 ppb, VC at maximum concentration of 1,200 ppb. Soil Vapor - PCE and TCE were detected in sub-slab soil vapor samples both on and off-site with concentrations up to 773,000 ug/m3 and 19,300 ug/m3, respectively; PCE and TCE were detected in on-site and off-site soil vapor samples with maximum concentrations of 4,630 ug/m3, and 2,710 ug/m3, respectively; PCE was detected in indoor air at maximum concentrations of 66 ug/m3 and TCE was at 1.7 ug/m3. "

Health Problem: "Direct contact with contaminants in the soil is unlikely because the site is covered with buildings and pavement. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into overlying buildings and affect the indoor air quality. This process which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Actions have been taken on-site to address potential exposures associated with soil vapor intrusion. Additional investigation is needed to evaluate the potential for soil vapor intrusion off-site."

674 NINTH AVENUE (Continued) **S109527357**

Updated By: CXMAYCOC
Site Description: "Location: The site is located in a mixed commercial and residential area. The property address is 674 Ninth Avenue, New York, NY 10036. The property is one tax parcel identified by the New York City Department of Finance as Block 1037, Lot 63. The site is located along the east side of Ninth Avenue, north of West 46th Street, south of West 47th Street, and west of Eighth Avenue. The approximate site area is 2,325 square feet (0.05 acres). Site Features: The site is improved with a two (2) story building that is currently vacant. The building is comprised of two (2) units totaling 3,988 square feet. The building was constructed prior to 1890 and originally consisted of a four-story building with a one-story addition off the rear. In 1936, the building consisted of a two-story building with a basement and a one-story addition. Current Zoning and Land Use: The site is zoned R-8 residential with a C1-5 commercial overlay. The site is additionally part of the Clinton Special zoning district. R-8 residence districts can range from mid-rise, eight- to ten-story buildings to much taller buildings set back from the street on large zoning lots. The C1-5 commercial overlays within residence districts are mapped on streets that serve the retail needs of local residents. In mixed buildings such as the site, commercial uses are limited to one or two floors and must always be located below residential use. The surrounding area consists of mixed commercial and residential buildings. Past Use of the Site: The site was developed prior to 1890 and was historically occupied by the following businesses: Herman Kellerman Painters and Supplies from 1920 through 1934, Harold Alpert Linoleum and Carpets from 1938 through 1983, Empire Tailors & Cleaners from at least 1988 through 2018, Teknokool in 1998, Marlen Gallery in 2000, New York Tae Kwon Do Academy in 2006, and JMC Custom Framing, Inc. from 2010 through at least 2014. The former dry-cleaning operations have impacted the site. Site Geology and Hydrogeology: Subsurface soils at the site consist of silty sands underlain by clay soils. Drilling refusal below the clay was due to bedrock. A review of the Bedrock and Engineering Geologic Maps of New York County revealed bedrock is located at approximately 15 feet bgs in the vicinity of the site. During the investigation, bedrock was encountered at a shallower depth of 10 feet or less bgs. Groundwater is expected to flow to the west towards the Hudson River or to the south based on bedrock geology. Groundwater was not encountered in any of the borings advanced as part of the limited site investigation. "
Env Problem: "Soil was analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Soil Vapor and Indoor air were sampled for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for OU 1 include trichloroethene (TCE) and Terachloroethene (PCE). Soil - PCE was found near the southeast portion of the property at a depth of about 5 feet below the soil surface, at a concentration slightly exceeding the soil cleanup objective (SCO) for restricted residential (19 ppm). Additionally, a soil pile found in the property s basement was analyzed and various SVOCs, as well as TCE were found at concentrations exceeding their respective restricted residential SCOs. Soil Vapor and Indoor Air PCE and TCE were detected in sub-slab soil vapor at elevated concentrations up to 1,200 and 3 micrograms per cubic meter (ug/m3), respectively. PCE and TCE were also detected in the indoor air at elevated concentrations up to 180 and 2.6 ug/m3,

674 NINTH AVENUE (Continued) **S109527357**

respectively."

Health Problem: "The site is covered with buildings and pavement; however, people may come into contact with contaminated soil if they dig below the surface. The area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the soil vapor (air between soil particles) may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Environmental sampling indicates that the potential exists for the inhalation of site contaminants due to soil vapor intrusion for the on-site building and off-site structures."

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/25/2024

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

RES DECL: Restrictive Declarations Listing
A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

UST FINDER: UST Finder Database
EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

VAPOR REOPENED: Vapor Intrusion Legacy Site List

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

MGP: Manufactured Gas Plants Listing
From the late 1800's to the mid 1900's, hundreds of manufactured gas plants across New York State supplied homes and industry with fuel for heating, cooking, and lighting. Today, the New York State DEC is overseeing the investigation and cleanup of contamination left behind from these plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

South Map:	14115940 BROOKLYN, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

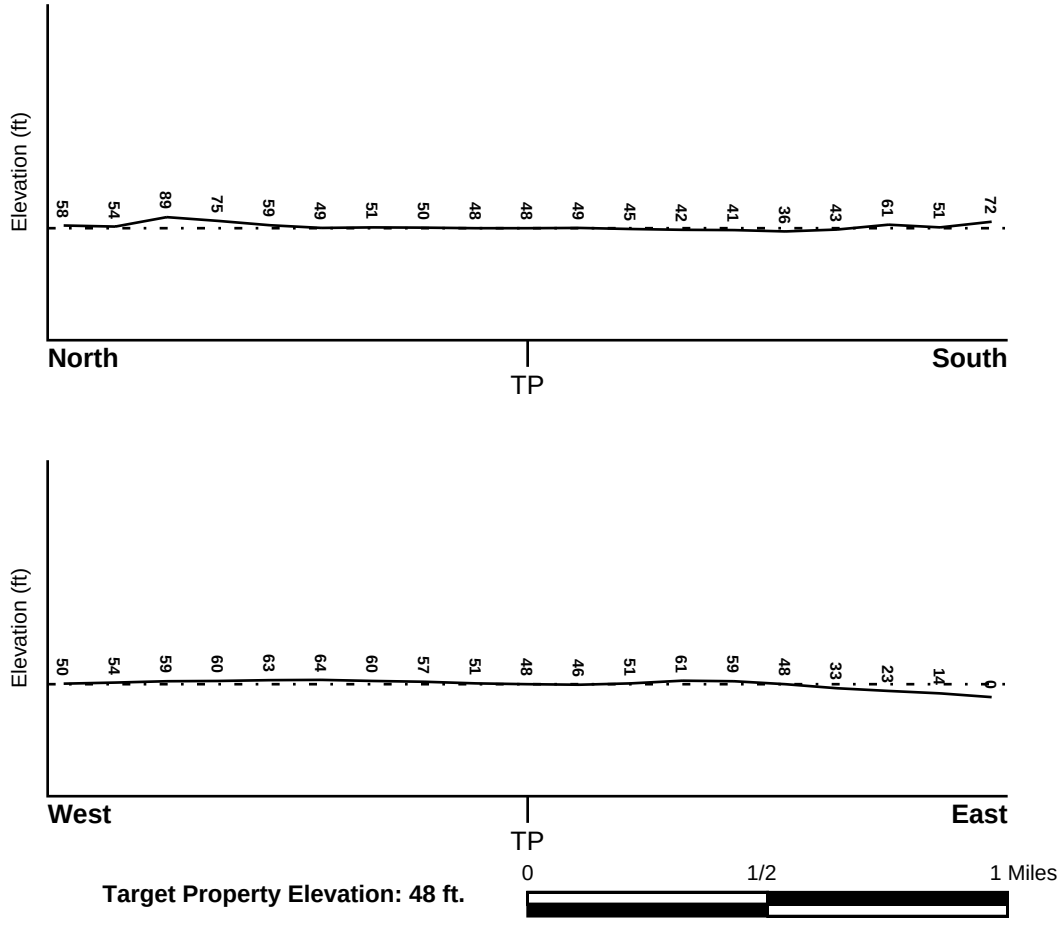
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 48 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970088F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
3604970089F	FEMA FIRM Flood data
3604970201F	FEMA FIRM Flood data
3604970202F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CENTRAL PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
11	1/2 - 1 Mile NE	NNW
1G	1/2 - 1 Mile NE	NNW

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovician		
Series:	Middle Ordovician (Mohawkian)		
Code:	O2 *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Source: New York Department of Health
Telephone: 518-458-6731

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Database
Source: Department of Environmental Conservation
Telephone: 518-402-8072
These files contain records, in the database, of wells that have been drilled.

RADON

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

New York, NY 10022
EDR Inquiry # 7836661.3

Client Name:

Hillmann Environmental Co.
1600 Route 22 East
Union, NJ 07083
Contact: Joanne Bedkowski

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hillmann Environmental Co. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Limited Permission To Make Copies

Hillmann Environmental Co. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

Request a Record

Please make your request specific so you receive the fastest service. After you submit a FOIL request you will receive a confirmation number so you can track the status of the response. The agency will notify you about how much time is required to respond to your request.

Category (optional)

Selecting a category helps clarify which agency will receive the request by listing agencies grouped by categories.

Environment

Agency (required)

Select the agency that will handle your request.

Department of Environmental Protection (DEP)

Request Title (required)

FOIL Request

78 characters remaining

Note: The agency, category, and title of your request will be visible to the public. Do not enter personal information here.

Ex: Queens Blvd Roadwork Permit.

Request Description (required)

We are looking for records regarding above and underground storage tanks, violations and/or permits, spills, and hazardous materials of environmental concern as we are conducting a Phase I Environmental Site Assessment. (My ref#: Z3-5243), Time frame: 01/01/1940 - 11/22/2024, 460-466 Park Avenue, New York, NY 10022 - Block: 1293, Lot: 35

4656 characters remaining

Note: The request details you write here will not be visible to the public. However, the agency may post a description of the records provided.

Ex: Roadwork permits for work done in on Queens Blvd. between 40th and 45th streets, Borough of Queens, in September and October 2017.

Upload File (optional, must be less than 20 Mb)

Choose File

No file uploaded

Personal Information

First and last name fields are required. The Email field is optional but recommended. If you do not provide an email you must enter either a phone number, fax number, or address in the Alternate Contact Information section.

This information will not be publicly viewable on this site. You must provide contact information so that the agency can respond to your request for records.

Request Type:	Freedom of Information Law Request
Description:	A FOIL request is a request for any "record" under NY's Freedom of Information Law (Article 6 of the Public Officers Law). Section 86 defines a "record" as: "any information kept, held, filed, produced or reproduced by, with or for an agency or the state legislature, in any physical form whatsoever including, but not limited to, reports, statements, examinations, memoranda, opinions, folders, files, books, manuals, pamphlets, forms, papers, designs, drawings, maps, photos, letters, microfilms, computer tapes or discs, rules, regulations or codes. NYSDEC maintains records in a variety of forms, or media, such as in hard copy (on paper), as recordings, as photographs, in electronic form, etc.
Contact E-Mail:	jbedkowski@hillmanngroup.com
Reference No:	W139585-112224

Type of Record(s) Requested:	Other
Description of Record(s) Requested:	We are looking for records regarding above and underground storage tanks, violations and/or permits, spills

	Environmental Site Assessment. (My ref#: Z3-5243), Time frame: 01/01/1940 - 11/22/2024, 460-466 Park Avenue, New York, NY 10022 - Block: 1293, Lot: 35
NYSDEC Office processing the Request:	Region 2 (New York City) Covers the counties of Brooklyn Bronx Manhattan Queens and Staten Island **If your request pertains to just one Region, select that Region. If your request pertains to more than one Region, select Central Office. If you're unsure which Region your request pertains to, select Central Office. The Department will route your request to the appropriate Region(s)**
Preferred Method to Receive Records:	Electronic copies **NYSDEC will use its best efforts to provide records via the method you select. However, in some cases a particular delivery method is not feasible. In such cases NYSDEC will deliver the records via an alternative method**

Please note not all public documents are available in electronic format. If the document(s) requested are not available electronically, we will make them available for inspection or by paper copy in accordance with the Public Records Law.

Sec. 612.3 sub-4 Building Code, C26-273.0 Adm. Code

"Prior to the occupancy of a structure erected or altered after January 1, 1938, the authorized occupancy of each floor of said structure as stated in the certificate of occupancy shall be permanently posted under glass and maintained in the main entrance hall of such structures."

Joseph Draffen
ACTING Borough Superintendent.

(Page 1)

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Joanne Bedkowski

From: New York DEC FOIL Center <newyorkdec@govqa.us>
Sent: Friday, November 22, 2024 5:24 PM
To: Joanne Bedkowski
Subject: FOIL Request :: W139585-112224

Dear Joanne:

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 11/22/2024 and given the reference number FOIL #W139585-112224 for tracking purposes. You may expect the Department's response to your request no later than **12/24/2024**.

Record Requested: **We are looking for records regarding above and underground storage tanks, violations and/or permits, spills, and hazardous materials of environmental concern as we are conducting a Phase I Environmental Site Assessment. (My ref#: Z3-5243), Time frame: 01/01/1940 - 11/22/2024, 460-466 Park Avenue, New York, NY 10022 - Block: 1293, Lot: 35**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

Click here to login to the FOIL Center.

US EPA AHERA Asbestos Inspector

New York State Asbestos Project Monitor

New York State Air Sampling Technician

NJDEP GIS Training

Environmental Audit and Site Assessments (Rutgers NJAES)

40HR OSHA Hazardous Waste Operations and Emergency Response (HAZWOPER) Training

8HR OSHA HAZWOPER Refresher Training

WITH HILLMANN SINCE 2017

PROFESSIONAL EXPERIENCE

As a Senior Project/Account Manager, Mr. Hindin advises private and public sector clients on a broad range of environmental projects including due diligence (Phase I and II), regulatory compliance, HSE audits, soil and groundwater remediation, and mold investigations and asbestos surveys. He is particularly well versed in environmental health and safety regulations and has a wide range of HUD Part 58, NEPA, and HEROS experience including:

- Successful submission of environmental reviews for HUD funding in formats required by the Responsible Entity including via the HUD Environmental Review Online System (HEROS).
- Navigating the requirements specific to the scope of projects ranging from administrative changes, interior rehab, to demolition and new construction for single-site and multi-site portfolios from the east to west coasts.
- Frequent communication with the client on environmental review submission progress.
- Efficient execution of any add-on requirements that may arise (e.g., archaeological studies, wetland delineation etc.).
- Understanding early in the review process any unique local requirements to avoid proposed project timeline setbacks.
- Reaching out to contacts within HUD and various agencies for clarification and guidance, negotiating and advocating for proposed project funding approval.
- Collaborating with various members of the Hillmann team (including Engineers, Architects, CIH's, Geologists etc.) to see the environmental review through to completion even when complex compliance steps or mitigation is required to achieve release of funds.

RELEVANT PROFESSIONAL EXPERIENCE

Consultant to Health, Safety and Business Continuity teams of Fortune 500 Companies, global banks, capital groups and property managers/developers.

NJDEP Watershed Ambassadors Program
Mr. Hindin worked as a New Jersey Watershed Ambassador for the NJDEP where he monitored water quality utilizing NJDEP protocols and online reporting software, utilized GIS, NJGeoWeb, and DataMiner to research assigned water bodies and surrounding areas.

WITH HILLMANN SINCE 2004

PROFESSIONAL EXPERIENCE

Mr. Hirschmann is currently the Director of Environmental Services at Hillmann Consulting, LLC. As such, he is responsible for performing environmental due diligence, including Phase I ESAs and desktop reviews, managing and implementing soil, groundwater, and soil vapor subsurface investigations and remediation, regulatory compliance, storage tank closure and installation, and third party document review.

Mr. Hirschmann has extensive experience in performing due diligence site assessments, evaluating and investigating sites for subsurface contamination, and instituting remedial activities for commercial and industrial properties including City & State regulatory & brownfield programs. He also performs SPCC plan preparation and hazardous materials management as well as environmental compliance.

RELEVANT PROJECT EXPERIENCE

Pennrose | Brooklyn, NY
The project was a RAD-conversion of multiple multi-family apartment buildings with environmental requirements from NYS and NYC. Mr. Hirschmann functioned as the Project Director for Hillmann and conducted remedial investigation activities and prepared the Remedial Investigation Report (RIR). Based on the RIR, Hillmann prepared a Remedial Action Workplan (RAWP) subsequently approved by NYS and NYC. Under the direction of Mr. Hirschmann, Hillmann provided remedial design and oversight for underground storage tank removals, contaminated soil removal, groundwater remediation and installation of sub-slab depressurization systems (SSDS) for vapor mitigation. A Remedial Action Report (RAR) was issued at project completion documenting successful implementation of remedial actions.

Monadnock | Manhattan, NY
The project was a RAD-conversion of 15 campuses of multi-family apartment buildings with environmental requirements from NYS and NYC. Mr. Hirschmann functioned as the Project Director for Hillmann and conducted soil, groundwater and soil-vapor remedial investigation activities and prepared the Remedial Investigation Report (RIR) within a short timeframe to keep the project within funding requirement timelines for the Client. Based on the results of the RIR, Hillmann prepared a Remedial Action Workplan (RAWP)

HILLMANN
CONSULTING

RELEVANT PROJECT EXPERIENCE CONTINUED

documenting required remedial activities including installation of sub-slab depressurization systems for vapor mitigation and specifications for underground storage tank removal.

The Doe Fund | Bronx, NY
Identified as a spill case with confirmed soil, groundwater, and soil/vapor contamination with the New York State Department of Environmental Conservation (NYSDEC) and brownfield and e-designation site with New York State Office of Environmental Remediation (NYCOER). Mr. Hirschmann functioned as the Project Director for Hillmann and prepared the remedial investigation work plan (RIWP), conducted remedial investigation activities and prepared a Remedial Investigation Report (RIR). Based on the RIR Hillmann prepared a Remedial Action Work Plan (RAWP) that was subsequently approved by the NYSDEC and NYCOER. Under the direction of Mr. Hirschmann, Hillmann provided oversight and direction of remedial activities, including implementation of a Community Air Monitoring Plan, during site redevelopment activities.

Women in Need | Brooklyn, NY
Identified as an e-designation and brownfield case with soil and soil/vapor contamination with NYCOER. Mr. Hirschmann functioned as the Project Director for Hillmann and prepared the remedial investigation work plan (RIWP), conducted remedial investigation activities and prepared a Remedial Investigation Report (RIR). Based on the RIR Hillmann designed and prepared a Remedial Action Work Plan (RAWP) that was subsequently approved by the NYCOER. Under the direction of Mr. Hirschmann, Hillmann provided oversight and direction of remedial activities during site redevelopment activities.

TLK Manor | Bronx, NY
Identified as a contaminated property under the purview of NYCDEP, Hillmann provided investigation and remediation services related to redevelopment activities. Mr. Hirschmann functioned as the Project Director and conducted the remedial investigation and prepared a Remedial Action Work Plan based on the results of the soil, groundwater and soil/vapor investigation. During redevelopment activities, under the direction of Mr. Hirschmann, Hillmann provided oversight and direction of remedial activities including implementation of a Community Air Monitoring Plan.

BP Real Estate Fund | Queens, NY
Hillmann was retained to address the e-designation on the property for hazardous materials prior to redevelopment activities. Mr. Hirschmann functioned as the Project Director and prepared a Remedial Investigation Workplan, conducted the Remedial Investigation soil, groundwater and soil vapor sampling activities and issued the Remedial Investigation Report to the NYCOER. The NYCOER subsequently removed the e-designation from the property after review and approval of project documents.

HILLMANN
CONSULTING

RELEVANT PROJECT EXPERIENCE CONTINUED

AIG | Bernardsville, NJ
The Property had a leaking underground storage tank (UST) identified as a spill case with the New Jersey Department of Environmental Protection (NJDEP) and contained widespread soil and groundwater contamination. Hillmann provided investigation and remedial activities at the site including: delineation of soil and groundwater contamination, preparation of remedial action plans for the NJDEP, enhanced fluid recovery for groundwater remediation, injection remediation of groundwater including chemical oxidation material and microbe material to break down and remediate the elevated contaminants found in the groundwater. Mr. Hirschmann was the Project Manager and NJDEP certified Subsurface Evaluator for the remedial activities.

City of Newark | Newark, NJ
Hillmann provided investigation and remediation activities for five City owned brownfield properties. Mr. Hirschmann functioned as the Project Manager for oversight, design, implementation and management of soil and groundwater remedial investigations at the properties.

Unique People Services | Bronx, NY
Identified as a contaminated property under the purview of NYCDEP, Hillmann provided investigation and remediation services related to redevelopment activities. Mr. Hirschmann functioned as the Project Director and conducted the remedial investigation and prepared a Remedial Action Work Plan based on the results of the soil, groundwater and soil/vapor investigation. During redevelopment activities, under the direction of Mr. Hirschmann, Hillmann provided oversight and direction of remedial activities including implementation of a Community Air Monitoring Plan.

Notias Construction | New York, NY
Hillmann provided environmental investigation activities for 5 separate sites in Manhattan, NY. Mr. Hirschmann functioned as the Project Manager and prepared Phase II Investigation workplans for soil and soil-vapor sampling, directed site investigation activities and prepared Remedial Investigation Reports for each site. Where contamination was identified, Mr. Hirschmann prepared Remedial Action Work Plans for slated redevelopment activities.

AIG | Various Northeast Locations
Hillmann provides ongoing environmental consulting for this client including decommissioning of fuel oil storage tanks, investigation and remediation of fuel oil contaminated soil and groundwater. Mr. Hirschmann provides third-party oversight on behalf of this client to ensure the contractors/consultants onsite are performing project activities in accordance with industry and regulatory protocol. When applicable on certain projects, Mr. Hirschmann will also direct full remedial investigation and remedial activities as the project manager.

OPRHP PR 24PR11544

Dear Ms. Justiniano

On behalf of our clients, KITA, the owners and operators of 460 Park Avenue, New York, NY, (the Building) Skidmore, Owings & Merrill (SOM), are writing to you in response to the State Office of Historic Preservation's (SHPO) letter dated January 16, 2025.

We understand that SHPO has suggested the 460 Park Avenue Building is eligible for listing on the State or National Registers of Historic Places (S/NRHP) citing its architect, Emery Roth & Sons, its pressed metal facade, its construction in the mid-1950s and its intact state.

While the preservation of mid-century modern buildings is an important objective, 460 Park Avenue is not listed among the notable mid-century buildings identified for preservation by the City of New York's Landmarks Preservation Commission (LPC) or organizations such as DoCoMoMo, which is dedicated to the preservation of modern architecture.

Additionally it is also important to note that other protected resources embody the distinctive characteristics of the period referenced by SHPO, better than 460 Park Ave. For example, the Socony Mobil Building on East 42nd Street with a similar pressed metal facade, and the Chrysler Building, the crown of which is pressed metal have been designated landmarks by LPC. This further underscores the iconclusion that 460 Park Avenue does not represent a unique or exceptional example of this mid-century architectural style.

Furthermore, 460 Park Avenue has undergone significant modifications over time, including the following alterations:

- c. 1960 A marquee was added on the Park Avenue entry.
- Over time, the majority of the glass lites have been replaced. The replacement process led to alterations to the surrounding facade.
- c. 2000: The lobby and entry storefront underwent a complete replacement.
- 2002-2004: Full painting of the existing aluminum facade on the southeast and portions of northwest elevations..
- 2008: Significant changes to the ground-floor retail facade including expansion at the western end of the south elevation, and at the entry.
- 2017: The marquee was replaced in an elongated form.
- Changes to the top of the Building, done over time, including a new enclosure.
- The unpainted portions of the aluminum facade have discolored due to oxidation.

As a result of these alterations and modifications the exterior facade of the Building no longer retains its original form or character.

Additionally, 460 Park Avenue is no longer suited to the needs of current tenants, the modern demands of office space in the Park Avenue submarket, nor the requirements of the City and State in particular Local Law 97 (LL97) and the need for a sustainable and energy efficient buildings to reduce the use of

carbon-based fossil fuels. Specifically:

- The punched window fenestration limits daylight access to the Building's deep floors. This is a key aspect of any workspace supporting wellness.
- The existing aluminum facade is poorly insulated, prone to leakage and will make it very difficult if not impossible to meet LL97 requirements.
- The replacement glass is single pane/monolithic and offers little or no insulation value.
- The Building's enclosure, including horizontal surfaces, offers little insulation value, contributing to higher energy consumption making it impossible to reach the LL97 goals in a timely manner.
- The mechanical systems are inefficient due to their advanced age, that and the requirements of LL97 will require complete replacement to meet energy, wellness standards, and resilience. The new system will remove the need for 3' high heating convectors at the perimeter.
- The proposed revisions will provide significantly larger windows maximizing daylighting and reducing energy for lighting.
- Necessary upgrades to the top of the Building to accommodate overruns, a back-up generator, and other new mechanical equipment would further alter the Building's structure.

Thank you for your consideration.

Sincerely,
Skidmore, Owings & Merrill

Kenneth A. Lewis, AIA
