I. INTRODUCTION AND OBJECTIVE

This Public Participation Plan (PPP) has been prepared by AMC Engineering, PLLC (AMC) on behalf of the New York City Economic Development Corporation (NYCEDC, hereinafter referred to as “Owner”) and the New York City Department of Parks and Recreation (NYCDPR, hereinafter referred to as “Applicant”) to fulfill and comply with the requirements of New York State Department of Environmental Conservation (NYSDEC) **Commissioner Policy 29, Environmental Justice and Permitting (CP-29)** for their proposed construction activities at the NYCEDC Bobby Wagner Walkway and associated structures.

The NYCEDC is the owner of this project and implements the work activities. The NYCDPR is the owner of the BWW and applicant for the SPDES permit application. This PPP has been prepared as part of the SPDES permit application. AMC Engineering, PLLC (AMC) has been retained as a subconsultant (through Hunter Roberts Construction Group), to obtain the dewatering permits for this Contract.

This PPP has been developed in accordance with the procedures established in CP-29 Section V.D, and it aims to help ensure meaningful and effective public participation throughout the NYSDEC environmental permit review process. Public participation in the NYSDEC environmental permit review process will be accomplished through a program of activities that enables stakeholders to stay informed and involved during the review of this proposed action.

The objective of this PPP is to outline and describe the activities that the applicant will implement to actively seek and enhance public participation during the application review process.

Figure 1. Project Location and Potential Environmental Justice Area(s)

(Note: This map was obtained from the NYSDEC database. The blue/purple-shaded areas represent Potential Environmental Justice Areas [PEJA]).

II. PROJECT DESCRIPTION AND PROPOSED ACTION

Project Overview

This project involves the replacement and reconstruction of the two stretches of the Bobby Wagner Walk (BWW) esplanade, the 107th Street Pier, and associated shoreline elements (i.e. outfalls and pipes). These structures are severely deteriorated and require reconstruction to meet specified resiliency and design life criteria. This will be achieved through the installation of new structural components supported by deep foundations, including upgraded outfalls and outfall support infrastructure. This project is located along the coastline in East Harlem and will require temporary groundwater discharge into the Harlem River.

The project is split into two (2) areas and utilizes fourteen (14) points of discharge, which were determined based on the work location and scope of work. Across the site, grade elevation was located at approximately El: +10.55' to +11'. Groundwater was found between El: -2.60' and +2.65', due to tidal influence. Based on existing Geotechnical Reports, the subsurface conditions consist of a surficial fill layer to the water table, underlain by organic clay and silt. Based on these conditions, it is anticipated that dewatering activities will be achieved through a series of sump pits fitted with submersible pumps. Up to 144,000 gallons per day (100 gallons per minute) of dewatering discharge is expected.

The applicant has submitted the SPDES permit application to the NYSDEC for dewatering activities associated with this project. A SPDES permit is required because the dewatering system will be discharged directly into the surface water (Lower East River and Harlem River). A Water Withdrawal Permit is required for this project because the proposed withdrawal of groundwater exceeds 100,000 GPD (as per 6 CRR-NY Part 601). The project location can be found in **Figure 2**.

The potential pollutants in the pumped groundwater require treatment to meet discharge limitations into the surface water. The proposed treatment consists of one 18,000-gallon settling tank, a 1-bag filter unit fitted with 5-micron filter bags, and two (2) 2,000-lb activated carbon vessels in series. The entire treatment system is proposed to be placed on top of a barge, which will be located next to the work area and travel down the Lower East River and Harlem River as the work areas change. The effluent from the treatment system will be directed into a discharge hose, which wraps around the barge and secured to the bottom of the barge. The discharge will be pointed towards the Rivers (away from the shoreline). Since the hose will be secured below the barge, the discharge will always remain below the water surface and above the bottom of the channel.

The water quality is controlled via the periodic sampling of the effluent and comparing the results to the applicable standards, as stipulated in the SPDES permit.

Nature of Proposed Project/Action and Purpose

This project includes the replacement and reconstruction of the Bobby Wagner Walk (BWW) esplanade, the 107th Street Pier, and associated shoreline elements (i.e. supporting structures, outfalls, and pipes). Work activities include thirty-two (32) outfalls and supporting structures that are located within two (2) continuous stretches of the walkway. Specific work activities are described below:

- **Area #1: BWW between East 94th and East 107th Streets** – work activities include nineteen (19) outfalls and supporting structures, further broken down as follows:
 - Thirteen (13) structures to be reconstructed;
 - Three (3) structures to be abandoned;
 - One (1) structure to remain in place; and
 - Two (2) structures to be removed;

- **Area #2: BWW between East 117th and East 124th Streets** – work activities include thirteen (13) outfalls and supporting structures, further broken down as follows:
 - Three (3) structures to be reconstructed;
 - Four (4) structures to be abandoned;
 - Three (3) structures to be protected in place; and
 - Three (3) structures to be removed;

All work is being performed under NYCEDC CONTRACT NO. 97960001

Dewatering activities are only required for structures being reconstructed, and, accordingly, are limited to thirteen (13) structures in Area #1 and three (3) structures in Area #2, totaling to sixteen (16) structures overall. A total of fourteen (14) points of discharge (PODs) are proposed to accommodate the dewatering activities for this project.

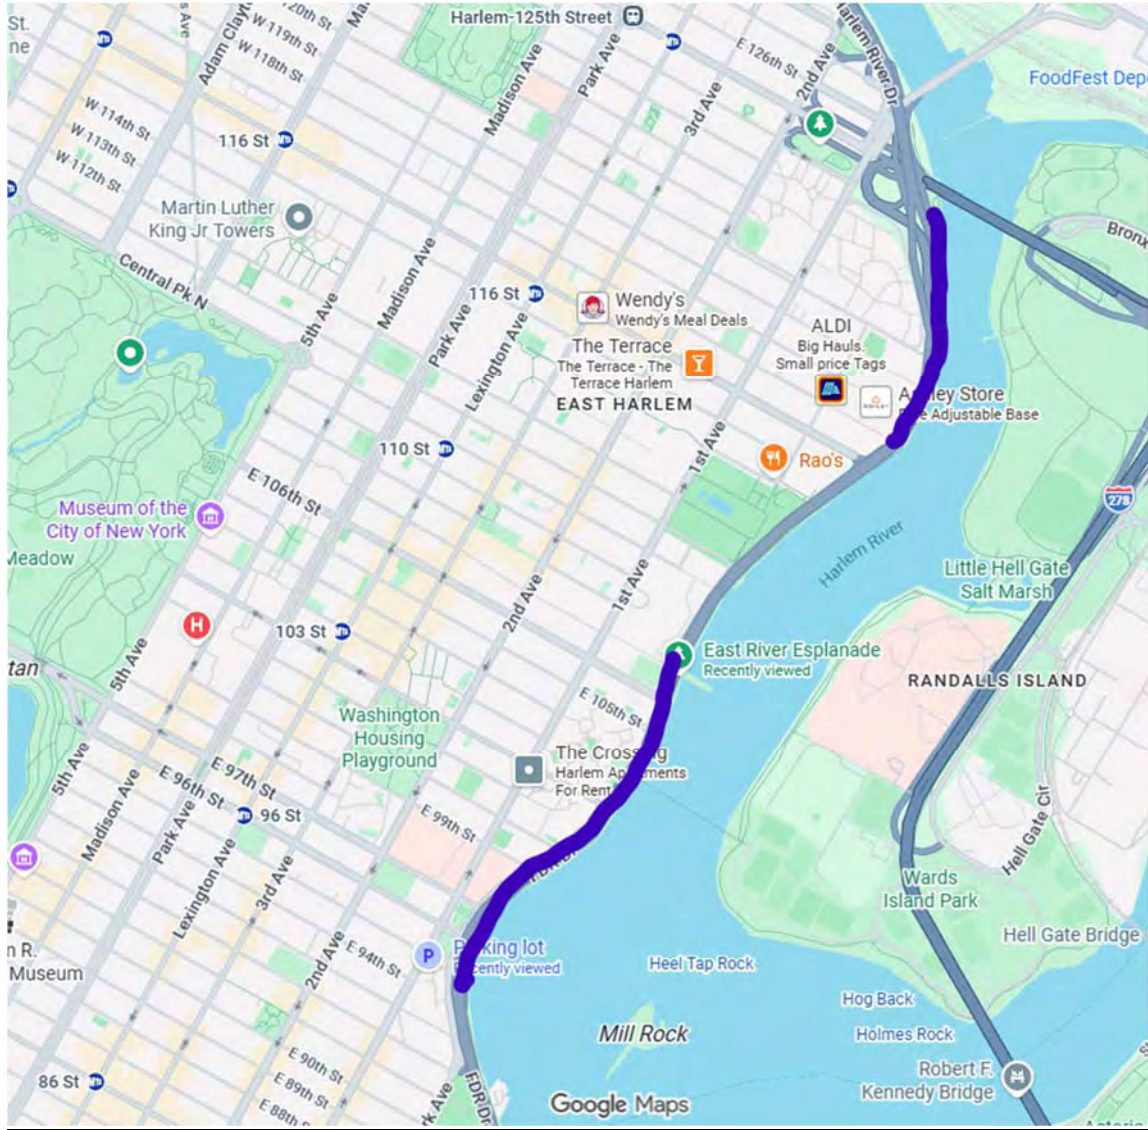

Figure 2. Key Map / Site Location Map

Potential Impacts

Any community impacts related to construction will be temporary in nature. Considering all work will be performed near the outfalls and within the Rivers, little to no impact is expected on the surrounding community. NYCEDC, NYCDPR, and their Contractors and Consultants (including Hunter Roberts Construction Group and AMC) propose to control all dust, rodent, noise, and vibration during the construction period. A representative will be available to answer questions relating to the project, and their contact information can be found in Section IV.

III. STAKEHOLDER IDENTIFICATION & CONTACT LIST

A contact list consisting of the names, mailing addresses, phone numbers, or email addresses of stakeholders to the proposed action is provided in **Appendix A**. The contact list includes individuals and organizations with a direct stake in the proposed action, or who have expressed interest in the proposed project or similar projects affecting the same neighborhood or community.

The current contact list has been developed in consultation with NYCEDC by identifying stakeholders that live, work and/or represent a neighborhood or community within a ½-mile (see **Figure 3**) radius of the project area from the following categories: local government and elected officials; business owners, residents, and occupants; local civic, community, environmental and religious organizations; local news media; administrators/operators of any school or daycare.

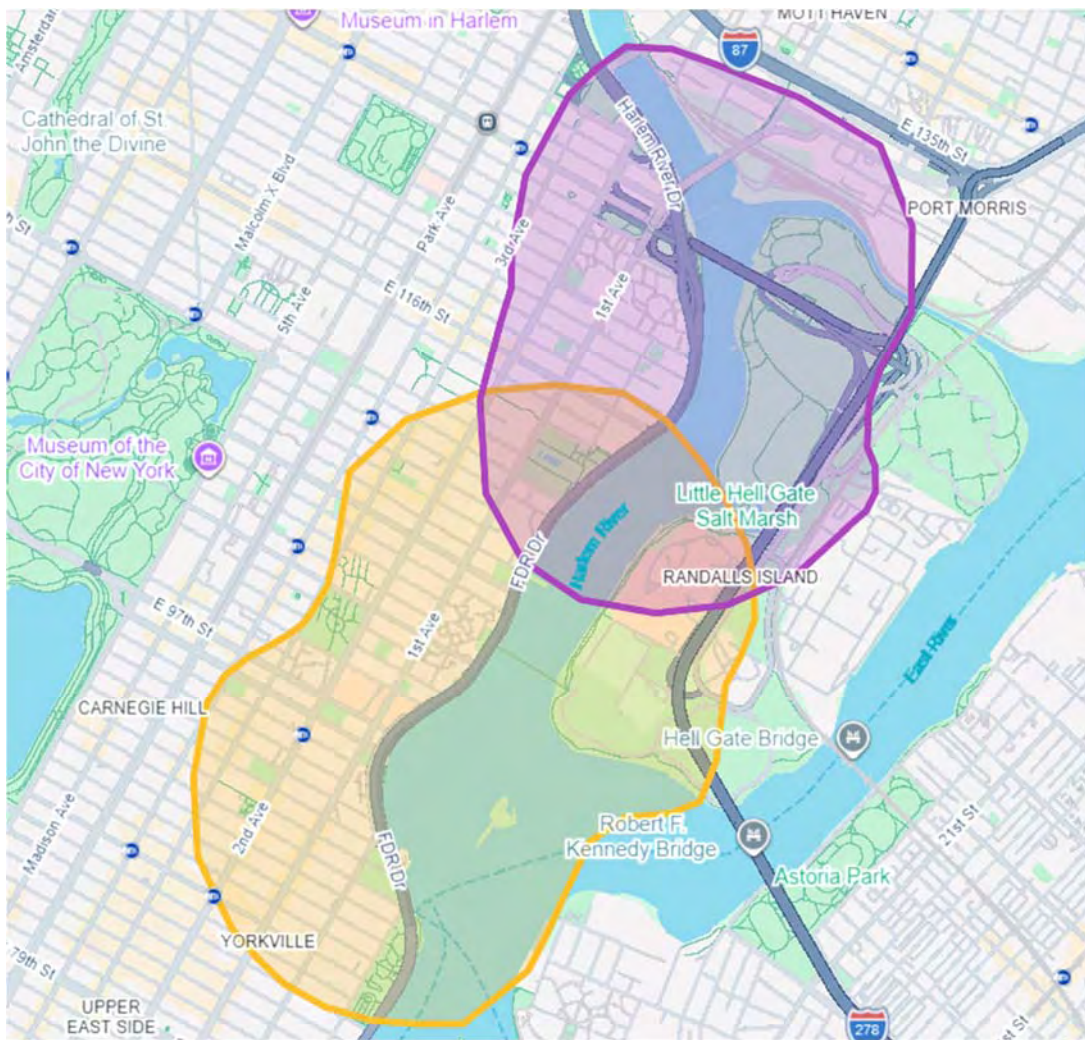

Figure 3. Site Radius Map

The applicant will utilize this contact list to communicate and disseminate information about the proposed project/action and permit application review process to the affected community and stakeholders. At a minimum, this includes distribution of the written information and outreach materials described in Section V to inform the community about upcoming public meetings and opportunities for public participation.

The contact list will be reviewed periodically and updated as appropriate throughout the permit application review process. The applicant will update the contact list with any new stakeholders identified during the public meeting or execution of other PPP components. In addition, individuals and organizations will be added to the contact list upon request. Such requests should be submitted to the project liaison identified in Section IV. Other additions to the contact list may be made at the discretion of the applicant or at the request of the NYSDEC project manager, in consultation with other NYSDEC staff, as appropriate.

IV. PROJECT LIAISON

A representative from the project team will be available during business hours:

Ms. Gentry Lock, RLA, WEDG
Principal, Landscape Architect
Stantec
475 Fifth Avenue, 12th Floor | New York, NY 10017
Pier107BobbyWagnerWalk@stantec.com
(212) 366-5600

Impacted residents and interested stakeholders can contact the project liaison listed above to provide input to the project team, discuss issues or concerns, ask questions, or request information. The project liaison shall respond in a timely manner that is commensurate with the question or information requested. The project liaison will be responsible for tracking and documenting all public input, inquiries, questions, and information requests received, along with responses provided.

V. PUBLIC OUTREACH ACTIVITIES

The applicant will utilize a range of engagement strategies and conduct various public outreach activities to facilitate participation, involvement, and direct communication with the affected community during the permit application review process. The applicant will implement the public outreach activities outlined below upon finalization and approval of this PPP by the NYSDEC.

In compliance with the requirements of CP-29, the applicant will hold public information meeting(s) to keep the public informed about the proposed action and the environmental permit review process. At minimum, the applicant will prepare, distribute, and post written information and materials, including a meeting notice and fact sheet, to encourage dialogue and solicit input from interested stakeholders during the permit application review process.

All public outreach materials and information will be prepared and presented in an easy-to-read, understandable format, using plain language free of legal terminology, and geared towards a non-technical audience.

The public meeting notice and fact sheet will be made available and disseminated in English and Spanish (by a certified translator). In addition, the public can contact the project liaison regarding the availability of language assistance and to request that the notice and fact sheet are translated into another language for comprehension by non-English speaking or limited proficiency stakeholders.

Public Meeting(s)

At the discretion of NYSDEC and, depending on the scale and nature of a project, one or more virtual public meeting(s) must be conducted to satisfy the intent of CP-29.

A meeting is typically required near the end of the permit application review process to inform the public about: the status of, or, if applicable, the availability of, final application materials and draft permits for review; the pending NYSDEC public comment period, and deadline to submit written comments to NYSDEC, if established; and eventual final decision. Meetings may also be held earlier, either pursuant to this plan or possibly even earlier during the initial design phase. If meetings were held prior to submission of this PPP, a summary of them should be included as an appendix.

Public Meeting: At or Near Completeness

The applicant will facilitate a virtual public meeting on **Tuesday, June 23rd at 6PM** to:

- Inform the public about the proposed project/action and permit application review status.
- Provide the opportunity to for stakeholders to ask questions and express concerns about the project and identify how to obtain information or answers to questions after the meeting has concluded.
- Inform attendees how they may submit written comments on the permit application to the NYSDEC during the public comment period and, if available, identify any applicable deadlines.

Necessary Meeting Discussion Points and Requirements

All meetings will be facilitated by the applicant and/or representatives from their project team (project personnel) via Microsoft Teams Meetings. During the meeting, the applicant and/or representatives from their project team will present a brief overview of the project, including any relevant background information, details on the permitting action, scope of work, schedule, and community impacts. The second part of the meeting will include a question-and-answer portion where the floor will be open for attendees to ask questions, make remarks, and/or express concerns. In addition, the following discussion points will be addressed:

- Providing an update on the permit application review process, and identifying outstanding application requirements and future milestones in the application review process.
- Making it clear that the meeting is being held prior to NYSDEC's permitting decision for the project/action.
- Identifying the location of the online document repository and providing instructions on how attendees may obtain and review materials relevant to the application. This includes documents related to the meeting and other Public Participation Plan components.
- Identifying and providing contact information for the project liaison and announcing procedures for how attendees may obtain answers to questions after the meeting has concluded. Interested stakeholders will be informed how to submit questions, express concerns, or request additional information by telephone, email, and in writing.
- Announcing any future outreach, opportunities for public participation, and/or required follow-up with attendees including, but not limited to, additional meetings and future mailings, such as the Notice of Complete Application.

Attendance will be recorded during the virtual meeting by a dedicated "scribe", who will record all members in attendance. (Note: Microsoft Teams allows people to call in without displaying a name, and the scribe will try their best to get a name for these callers). The applicant will track the number of attendees for all meetings held during implementation of this PPP and, where feasible and applicable, identify any affiliation of participants and interests represented at the meeting. In addition, the applicant will be responsible for documenting meeting notes or minutes, along with a record of comments and questions raised in the meeting and respective responses and answers provided. Attendees not identified on the contact list will have the option to be added in the event of future meetings or information sharing.

Virtual Public Meeting Notice Preparation and Distribution

Information regarding the details of the virtual public meeting(s) and how to participate via computer and/or telephone is contained in the reader-friendly meeting notice(s) shown in **Appendix B**. The notice has been prepared in English. It will be translated into Spanish by a certified translator. Through this notice, the public will be invited and encouraged to attend the public virtual meeting scheduled on **Tuesday, June 23rd at 6PM**.

Once the PPP has been approved by NYSDEC, the public meeting notice will be posted and available in the online document repository described in Section VI of this document. At least two weeks in advance of the public virtual meeting, the notice will be published in the 'El Diario' and 'AM New York: The Manhattan Express', which are newspapers that are printed, published, and circulated within the borough of Manhattan. In addition, the public meeting notice will be emailed, mailed and/or hand delivered (door-to-door) to the stakeholders identified in the contact list in **Appendix A** at least two weeks prior to the public virtual meeting.

Fact Sheet Preparation and Distribution

Factual information on the proposed project/action, including an overview, purpose statement, and potential impacts, is outlined in the reader-friendly fact sheet shown in **Appendix C**. In addition, the fact sheet outlines how interested stakeholders can: participate in the permit application review process; access the online document repository to review relevant application materials prior to the public meeting; and contact the project team to obtain additional information. The fact sheet has been prepared in English and will be translated into Spanish by a certified translator.

Once the PPP has been approved by NYSDEC, the fact sheet will be posted and available in the online document repository described in Section VI of this document. No later than 2 weeks prior to the public meeting, the applicant will distribute the fact sheet to provide stakeholders with relevant background on the proposed project/action and facilitate meaningful participation during the meeting. The fact sheet will be distributed together with the public meeting notice via email, mail and/or hand delivery (door-to-door).

The fact sheet(s) will also be posted within the vicinity of the project site and visible to the public. For example, they may be posted on some streetlight lampposts or bulletin boards located in the lobby of residential complex buildings or public facilities such as libraries, schools, or community centers within the project site.

Distribution of Notice of Complete Application

Once NYSDEC determines the application(s) for the proposed action/project is complete and provides the Notice of Complete Application (NOCA) to the applicant, the applicant will distribute the NOCA and draft permit, if applicable, to the meeting attendees and any identified interested parties, to provide notification regarding the start of the NYSDEC public comment period and to announce the deadline for submission of written comments to NYSDEC. If the NOCA is available at the time of the meeting, the applicant will distribute the NOCA at the public meeting. If the NOCA is not available at the time of the meeting, the applicant will provide explicit instructions on how to access the online repository and inform the attendees that, once available, the NOCA will be posted to the online document repository and will be distributed to attendees via email or mail as soon as possible, but no later than the date that the NOCA is published by the applicant in the print edition of a paid local newspaper that is circulated at least weekly and available in the municipality in which the project is located.

VI. DOCUMENT REPOSITORY

An online document repository has been established for the community and interested stakeholders to access and review information about the project. The online repository will provide information and documents relating to the project and permit application, and can be accessed through the following link, under NYCEDC CONTRACT NO. 97960001:

<https://edc.nyc/project/107th-street-pier-bobby-wagner-walk-reconstruction>

The repository will be updated throughout the application process with project-related information and written materials (i.e., application forms and supporting materials, draft permit, fact sheet, statement of basis (where applicable), the Notice of Complete Application provided by the NYSDEC, etc.).

VII. SUBMISSIONS

Final Summary Report and Written Certification

Upon completion of the enhanced public participation plan, the applicant will submit written certification to NYSDEC to certify that it has fully executed and complied with the approved PPP. The certification shall be signed by the applicant, or the applicant's agent, and submitted to NYSDEC prior to a final decision on the application.

As part of the certification, the applicant shall submit a final summary report documenting the implementation of this PPP. The report will summarize the activities that occurred in accordance with the PPP and will identify any substantive concerns raised by stakeholders during the public meeting, or at any time throughout the permitting process, and detail the applicant's response(s) to any such concerns or questions. The applicant will include, or append, any documentation that supports the final summary report, such as: the meeting sign-in sheet(s), record of attendees/participants, meeting presentation, notes or minutes, summary of questions and answers, and copy of newspaper notice or other proof of publication. In addition, the report will identify any changes or modifications to the proposed project that were made or considered by the applicant to address or reduce concerns surrounding the permit application.

The final summary report and written certification will become part of the application record and will be posted to the online document repository so that it is readily available to the public.

APPENDIX B

Virtual Public Meeting Notice

English & Spanish

YOU ARE INVITED

Virtual Public Meeting
TUESDAY, JUNE 23RD at 6:00 PM
Reconstruction of Bobby Wagner Walk & 107th Street Pier

The New York City Department of Parks and Recreation (NYCDPR) has submitted an application to the New York State Department of Environmental Conservation (NYSDEC) for a State Pollutant Discharge Elimination System (SPDES) Permit and Water Withdrawal Permit for the New York City Economic Development Corporation (NYCEDC) Bobby Wagner Walk reconstruction project. A Public Participation Plan (PPP) has been developed in accordance with NYSDEC Commissioner Policy 29, Environmental Justice and Permitting (CP-29). The purpose of this meeting is to inform the public about the project and to involve the community during the permit application review processes.

To Call-in Using a Phone

Dial in using the following number:

1 469-998-5874

**When prompted, enter the Conference ID:
533 509 379#**

Agenda:

- Project Overview
- Background
- Scope of work
- Project schedules
- Community Impacts
- Questions and Answers

Your Attendance is Important!

Project personnel will be available to answer questions from the community. For additional information on the proposed project:

- Contact: Ms. Gentry Lock by email at Pier107BobbyWagnerWalk@stantec.com, or by phone at: (212) 366-5600.
- Visit the repository at:
<https://edc.nyc/project/107th-street-pier-bobby-wagner-walk-reconstruction>

Contact the project liaison to request reasonable accommodation for a disability or interpreter services in a language other than English, so that you can participate in the call and/or to request a translation of any of the event documents into a language other than English.

NYC EDC Bobby Wagner Walk Restoration

Project Fact Sheet

- **Project:** Bobby Wagner Walk & 107th Street Pier Restoration
- **Applicant:** New York City Department of Parks and Recreation
- **Facility:** Bobby Wagner Walk in the following locations:
 - E 94th St to E 107th
 - E 117th St to E 124th St
 - 107th Street Pier
- **NYSDEC Application Number:** 2-6299-00040/00007
- **A Public Participation Plan (PPP) has been developed in accordance with NYSDEC Commissioner Policy 29, Environmental Justice and Permitting (CP-29)**

What is the Proposed Project?

The proposed project will include the replacement and reconstruction Bobby Wagner Walk (BWW) esplanade, the 107th Street Pier, and associated shoreline elements (i.e. outfalls and pipes). Work activities include up to 32 outfalls, and dewatering is needed for 16 structures. Since work will be performed below the groundwater table, dewatering activities may be required. A State Pollutant Discharge Elimination System (SPDES) permit and Water Withdrawal Permit are required to install and operate a temporary construction dewatering system for the purpose of pumping and discharging treated ground water into the Lower East River and/or Harlem River. The proposed treatment system will be placed on a barge located in the Harlem River and will travel down the river as the work areas change. The discharge will always occur below the water surface and will be directed away from the shoreline. The dewatering system may be operated 24 hours a day, as the excavated trenches may need to be kept dry overnight.

Why does this project need to dewater for the installation of shoreline elements near the outfall structures?

Dewatering activities are necessary if excavation work occurs below the groundwater table. The installation of the shoreline elements requires the ground below it to be dry for many reasons. For example, any concrete that is poured needs to be cured, which is only allowed in a dry environment. Additionally, any gravel or soil that is used to fill the excavation needs to be compacted. Some outfalls are located at lower elevations than others, resulting in the need for dewatering activities.

How might the project affect the surrounding community?

Any community impacts related to construction will be temporary in nature. Considering all work will be performed within the Bobby Wagner Walk all water will be discharged into the Lower East River and Harlem River, little to no impact is expected on the surrounding community. NYCEDC, NYCDPR, and their Contractors and Consultants (including Hunter Roberts Construction Group and AMC) propose to control all dust, rodent, noise, and vibration during the construction period. A representative will be available to answer questions relating to the project (see “where can I get more information about the proposed project” section, below)

How can I participate in the permit review process?

- Attend the upcoming virtual public meeting to learn about the project, ask questions, or express concerns. The meeting is scheduled for Tuesday, June 23rd at 6:00 PM.
- Reach out to the contact person listed below via email, phone, or postal mail with any questions, concerns, input, or comments.

Where can I get more information about the proposed project?

- The online document repository has application materials, relevant documents, and information about the project. The link can be found below:
<https://edc.nyc/project/107th-street-pier-bobby-wagner-walk-reconstruction>
- Contact Ms. Gentry Lock by email at: Pier107BobbyWagnerWalk@stantec.com, by phone: (212) 366-5600, or in writing at: 475 Fifth Avenue, 12th Floor, New York, NY 10017 for information on the project, instructions on how to attend the upcoming virtual public meeting, or to find out about the status of the permit application and public comment period.

Who is responsible for reviewing the Permit Application?

- The New York State Department of Environmental Conservation (NYSDEC) is responsible for reviewing and issuing the required permits.
